GRAND COUNCIL ANNOUNCEMENTS

The Grand Council announces the following petitions, charter grants, and installations:

(1) BETA-CHI Chapter installed in the University of Cincinnati, at Cincinnati, Ohio, on November 15, 1919, by Grand Historian and Editor, Dr. A. Richard Bliss, Jr., of Atlanta.

(2) KENTUCKY GRADUATE Chapter installed at Louisville, Kentucky, on November 17, 1919, by Grand Historian and Editor, Dr. A. Richard Bliss, Jr., of Atlanta.

(3) BETA-PSI Chapter installed in the University of Wisconsin, at Madison, Wisconsin, on December 6, 1919, by Dr. H. A. Lengenhan of the National Extension Committee.

(4) PSI Chapter revived in the College of Medicine of Baylor University at Dallas, Texas. Petition received, charter granted, and chapter will be installed on January 17, 1920, as PSI CHAPTER by Dr. C. A. Duncan of the National Extension Committee and Dr. C. R. Hannah of the Dallas Graduate Chapter. Reports will appear in the next issue of THE MASK.

(5) A petition for a charter as a collegiate chapter from a group of men in the Medical School of the Johns Hopkins University at Baltimore, Maryland. Charter granted and chapter will be installed on January 17, 1920, as BETA-OMEGA CHAPTER by Grand Regent Dr. Justin F. Grant of Boston and Grand Secretary and Treasurer Press W. Eldridge, Jr., of New York. Reports in the next issue.

(6) A petition for a charter as a collegiate chapter from a group of men in the College of Physicians and Surgeons of New York City. Charter granted and chapter will be installed as GAMMA-GAMMA CHAPTER on March 19, 1920, by Grand Regent, Dr. Justin F. Grant of Boston and Grand Secretary and Treasurer Press W. Eldridge, Jr., of New York. Reports in the next issue.

JANUARY, 1920

WHOLE No. 69

COLLEGE FRATERNITIES ACTIVE IN FIGHT AGAINST VENEREAL DISEASES

College men, largely fraternity men, have given invaluable aid to the United States Government in its comprehensive health campaign to eradicate venereal diseases. In response to a request from Surgeon General Rupert Blue of the U. S. Public Health Service, 215 fraternity chapters offered coöperation in varying degrees.

This coöperation includes efforts to give rational sex instruction to freshman initiates and to disseminate a knowledge of the dangers and consequences of venereal diseases. It also includes joining in community endeavors to eliminate or minimize prostitution in college communities. Furthermore, a score or more of fraternity publications devoted space to the campaign, publishing either formal articles or editorial encouragement of the movement. Fraternity members, both in college and those who have been graduated into business and professional life, have aided. In many instances lectures have been given by graduate fraternity members to the younger men in the active chapters.

The Surgeon General feels that the assistance thus far given is a fine augury of what is to be expected during the next year from fraternity members. It is recognized that the campaign against venereal diseases is in accordance with the tenets of Greek-letter fraternizing, and the "decent living" keynote of the educational work finds a ready response from all fraternities.

The old canard that "wild oats" had a place in the life of the college man has been proved a pernicious fallacy. Extensive investigation by the Public Health Service has shown that prostitution is the foremost spreader of gonorrhea, syphilis, and chancroid. Actual surveys show that 75% to 95% of all prostitutes, both public and clandestine, are infected with one or more of the venereal diseases, that as a class they are poisoned with gonorrhea and syphilis. Consequently, the request that communities repress prostitution is as urgent in the fight against venereal diseases as would be a call to rid a community of mosquito-breeding swamps if a malaria epidemic were to break out.

From the standpoint of public health venereal diseases may be said to be epidemic. They are sapping the vigor and stamina of the nation, weakening the American people as a race, and causing a heavy financial drain and untold misery. They contribute heavily to the blind and

insane asylums and are causing thousands of children to be born physically defective. This situation exists largely because of the ignorance on the part of the public as to the dangers and consequences of venereal infection and the necessity of proper medical treatment. The belief has been prevalent that gonorrhea was of slight importance and easily cured by a quack doctor, with the result that men have not been cured and have transmitted their infection to innocent wives and children. Syphilis has erroneously been considered incurable and consequently neglected and spread to others. Serious as they are, both diseases are curable if proper treatment is begun and continued long enough.

The war made it possible for the Government to undertake this definite and broad-gauged campaign to combat venereal diseases. Under the operation of the Selective Service Act a cross-section of the young manhood of the country was available for study. The examinations showed that 5% of the second million men called under the draft were infected with venereal diseases. This 5% did not include any cases where there was not ready evidence of infection, which excluded many cases of latent or passive syphilis or of chronic gonorrhea.

The majority of the men in the army were woefully ignorant of the consequences of venereal diseases, and many believed promiscuous sex relations necessary to health, a belief which the majority of intelligent physicians and laymen now know to be a damaging fallacy. Consequently, rational sex instruction, including accurate information on venereal diseases, was given all army men.

The national program for the control of venereal diseases in civilian communities formally began in July, 1918, and was coordinated closely with the work of the Army, Navy, and Marine Corps. If it was necessary to make men fit to fight, it was necessary to make them fit to live. Consequently, a law was enacted by Congress creating a Division of Venereal Diseases in the Public Health Service, and funds were appropriated to be allotted to the State Boards of Health. To secure Federal funds each state had to adopt regulations requiring that venereal diseases be made reportable, that patients be given free treatment, and that efforts be made to repress prostitution and to educate the public in the problems of sex and venereal disease.

At the close of the first year's work, 46 states had adopted the required regulations, secured Federal funds, and had organized bureaus in the state departments of health for venereal disease control. Most of these states have made appropriations from state funds for carrying on the work, and are therefore entitled to receive the Federal allotment for the year 1919-20.

The work of venereal disease control is classified under medical, educational, and law-enforcement measures.

As a part of the medical work of the first year, nearly 250,000 cases of gonorrhea, syphilis, and chancroid were reported to the State Depart-

ments of Health by physicians, health officers, and clinics. Over 60,000 physicians promised to report their cases and coöperate with the Government in its program. On January 12, 1920, there were 499 free clinics in operation.

As part of the educational activities, pamphlets were distributed, lectures given, exhibits and motion pictures shown. Intensive work was done through the big industrial establishments of the nation. Employers were asked to secure educational material for their employees, with the result that more than 2,000 firms paid for millions of pieces of educational material. Many of them have made arrangements to have the plant physician or some local doctor give free medical advice and treatment to employees needing it. The importance of handling the problem as an economic one is realized by both industrial and commercial organizations.

The legislative program has resulted in the passage of state laws for the suppression of prostitution and the control of venereal diseases by providing methods of reporting them and facilities for treatment and quarantine. The rehabilitation of prostitutes so that they may take their place in the legitimate life of the communities is an important part of this work. Practically every state now has the laws necessary to carry out the program effectively. Many cities have passed ordinances which meet their special needs.

The prevalence of gonorrhea and syphilis is partly due to a false standard of modesty which has made a frank and intelligent discussion of the problems of social hygiene slow and difficult. An enlightened public opinion which will demand the enforcement of the laws and which will be able to act intelligently upon sex problems is essential to their eradication.

For this reason the active assistance of the college fraternity men is desired. Education is necessary if the causes of venereal diseases are to be removed and the diseases themselves eradicated. College men did magnificent work as officers of the American Army. This war against venereal diseases also requires their fighting spirit, their courage, their idealism, and their everlasting persistence.

FOOT TROUBLES—THE CAUSE, CURE, AND PREVENTION

BY A. H. BRUNDAGE, PHAR.D., M.D., *Beta-Epsilon*,
Captain, Medical Staff (15 I. D.) Police Reserve, City of New York

It is a common observation that, as a rule, policemen are healthy, ruddy, and rugged. And the fact that they are, usually, in such excellent physical condition, speaks well for them, exposed as they are at all times to the vagaries of the elements—be it a drenching rain, a freezing blizzard, or the scorching sun of midsummer. But the number

of policemen constantly consulting and requiring the services of the Department surgeons, especially in reference to foot affections, establishes the evidence that the constant standing and walking, unless proper care is given to the feet—metes out its evil influence.

The continual standing and walking, for hours at a time, and the frequent and long-repeated pound and drive of his feet on the unyielding pavement, subject the policeman's feet to a severe strain and to a serious aggregation-effect of minor shocks. This often results in tender and aching feet. If increasing weight of body also adds its quota of evil effects upon the arches, upon their associated, sustaining muscles and ligaments, the damage may be not only rapid and severe, but truly crippling. Invariably, at the beginning of the foot trouble, there is more or less pain and aching, in the feet, when standing or walking; such condition is known as policeman's disease. It is an incipient, or more advanced, flatfoot condition. In the severe form of the affection, the muscles and ligaments of the instep have been so strained, and in time, even overstretched, that the arch of the foot has been broken down or actually obliterated; therefore a condition of induced flat-foot exists; the foot is altered in both shape and posture. The pain in the feet may be nagging or even neuralgic and almost unbearable. Pain in the legs and back may be associated with it. For temporary relief, the sufferer assumes body postures which are not only undignified but which may complicate the condition through undue strain upon other sets of muscles, inducing other aches and evils and developing bad postural habits. If such postures are long persisted in they are apt to produce a warping effect upon the body, resulting in "round-shoulders," "hollow-chest," and other improper, unseemly, and handicapping bodily angles.

Sometimes there is a predisposition to imperfect or obliterated arch. It may be due to weak insteps or ankles, dating from birth; or the predisposition may be the result of such diseases as diphtheria, scarlet fever, influenza, rheumatism, etc., in which excessive standing, walking, or the carrying of heavy weights was resorted to before adequate recovery from the effects of the disease. Furthermore, a predisposition may be caused by excessive exercises as in running, jumping (for distance or from a height), dancing, weight-lifting or weight carrying, etc.; also by a sudden, severe twist, sprain, or bruising of the instep or ankle; as in misstep, fall, etc.; also by long continued improper foot postures or unsuitable shoes.

THE EFFECTS OF THE DISEASE

In severe cases of policeman's disease, both the lengthwise and the lateral arches of the foot may be entirely obliterated so that the sole of the foot rests flat upon the ground instead of upon the heel, and the ball of the foot, and the sole is tipped or turned more or less outward, as is also the under-surface of the toes. The ankle becomes larger and fuller than normal and its outerbone unduly prominent, in which condi-

tion it is likely to be made sore by pressure from the shoe "upper." The sole of the shoe inclines to wear disproportionately fast along its inner border, thereby aggravating the evil. The convex curve of the upper aspect of the foot disappears, and the foot becomes lengthened. The vertical axis of the leg is thrown too far forward, thus increasing both local and general strain. The scaphoid or boatshaped bone, the astragalus or true ankle-bone, and the internal cuneiform (one of the "wedge-shaped" bones)—three of the seven tarsal or instep bones—are more or less displaced. The natural elastic give, or slight gliding motion upon each other, so characteristic of their relationship and action, is lost and the shock-absorbing and truly supportive character of the region, is seriously impaired. Progression becomes more or less clumsy, labored, and painful and ease and celerity of action practically impossible. How shall a guardian of the peace, thus handicapped, overtake and control a vicious, fleeing criminal or even ward off his alert attack? How shall anyone, thus afflicted, secure daily a truly recuperative repose so necessary in fitting or keeping fit for life's daily recurring duties?

IMPROPER SHOES A CONTRIBUTING FACTOR

Among contributing causes of flat foot, special mention should be made of improper shoes and a neglect of the feet. The wearing of pointed shoes, whereby the big toe is turned out and part of the natural inside support of the foot and of the body is lost, is a contributing cause. Likewise the cramping of the feet with tight shoes whereby the proper action of the supporting foot muscles is interfered with; also otherwise improperly fitting or unadapted shoes, as low shoes with weak ankles, or the continued use and neglected repair of run-over heels or soles, or both.

As regards the neglect of the feet themselves as a contributing cause: a policeman or any other person who, at frequent intervals, stands or walks for a long time, should give careful attention to the feet, whether damaged or not. The shoes should conform well to the natural shape of the feet. They should be nearly straight, on the inside border, in general outline, almost to the tip. If the arch is somewhat affected, the inside of the heel should be raised one-fourth of an inch. If much affected the inside of sole and heel should be raised one-eighth to three-eighths of an inch. Thus the weight of the body is thrown from the inner side to the outer side of the foot and the tendency to break the arch is much lessened or even actually corrected. This procedure also compels the wearer to keep his feet more nearly parallel, instead of turned out, in walking. For policemen especially, the soles of the shoes should be quite thick, so that the wearer shall not feel the irregularities in pavement or road, and that the shoe shall not easily soak through from wet streets, thereby wetting socks and feet; but the soles should not be so heavy as to be burdensome or to unnecessarily impede walking. The heels should be broad,

and have at least a "lift" removed and rubber heels applied to absorb and lessen shock in walking. The uppers should be soft enough to adapt themselves to variations in the outlines of the foot, but heavy enough to be duly warm in winter and not so thick and heavy as to overheat the feet in summer. They should be low enough in summer to be cool, and high enough in winter to suitably protect the ankles; and always so as to support weak ankles, or those inclined to swell when unsupported. Inasmuch as a certain amount of free-play at the ankle is a necessity in walking, and especially in climbing, it is often found desirable to leave the top-lacing of the shoe loose or even open, thus securing all of the "high top" advantages without the handicap of restrained ankle-action.

It is well to have two somewhat similar pairs of shoes, i. e., suited to the season, etc., to provide for a change in shoes every few days, in order to rest the feet—to ease up circumstantially developed points of special pressure, etc.

Although the shoes may fit well, allowing of due play of the feet within the shoes, and without loose or sloppy motion in them whereby otherwise inflammatory friction, various blisters, or abrasions might result, the shoes must not be so long as to invite toe-catching or stumbling in climbing stairs, or in encountering irregularities in the pavement; nor should the shoes be so short as to have a stubbing effect on the toes themselves.

CARE OF THE FEET

The toe-nails should be kept short enough to prevent their being driven into the flesh by the lurch of natural extension of the foot in the shoe. That such action occurs may be inferred from the observed effects of short shoes on long toe nails, by which the nails become bent down and the roots sore; also by the holes made in the toes of the socks.

The socks should fit well and be as soft and seamless as possible, altogether suitable to the weather and the kind and fit of the shoe—not heavy woolen ones in the summer, nor thin, cotton, gauze-like ones in the winter. The garters should not pull so as to draw upon the toes, nor be so unduly loose as to allow the sock to "hunch up" at the heel. Damp socks should be changed promptly, for sanitary, leather-and-lining preserving reasons, and to prevent actual damage to the foot, or a chilling or other injury to the body.

A person subject to hard callous of the foot, should keep the callous well pared and greased with mutton tallow, camphor ice, simple cerate, lanolin, or glycerite of tannin. These applications are good also for feet which are inclined to blister or are already sore.

Sweating feet are benefited by change of socks and by dusting a good talcum powder on them and into the feet of the socks. If the sweating is very free and troublesome, wash the feet with thymol soap and follow with a douching of clear water; then bathe them with a

one per-cent solution of formalin; let that dry on, then apply talcum powder, on the soles especially, or use boric acid or tannaform. Using alcohol as a beverage, in almost any form or degree, will aggravate the sweating.

TO CURE POLICEMAN'S DISEASE

Measures for the prevention of policeman's disease have been indicated in the foregoing paragraphs. Its cure differs somewhat, according to the degree of damage done. However, it may be said in a general way that the debilitated muscles and ligaments on the inside of the foot, and perhaps elsewhere, must be relieved of strain and be toned up by massage and suitable gentle exercise.

Of course the feet must be put at rest for a time at least and in an elevated position. The leg and instep muscles should be well massaged daily. The toes should be flexed and extended daily by the patient himself, and this kept up for some time; the foot should be worked outwards, circularly, on a horizontal plane, mainly to tone up the small muscles of the foot. Later, walking on the outer edge of the foot and rising to the toes and down again should be carefully practiced. When the foot is flat and clumsy but stiff and without pain, the arch may be fairly restored by giving an anesthetic and warping the foot back into shape and suppleness by employing a mechanical wrench, adapted for such procedure. The foot is then put up in a plaster of Paris splint for a few days, after which it is massaged and the exercises previously described are employed for several days, or longer.

When a flatfoot condition is of quite recent origin and very painful, rest in bed and massage for a few days is necessary; then a plaster of Paris splint may well be applied, after the foot has been turned and shaped properly; later, the massaging and special exercise previously described should be employed. A piece of felt fitted to the foot, so placed in the shoe as to approximate, nearly, if not exactly, the natural arch of the foot, often is all the appliance that is necessary in mild cases. A leather, metal, or combined arch-support may prove helpful. If employed, such arch-support should be from one-eighth to three-eighths of an inch higher on its inner border, than on its outer one. A good way to get a good fit in a removable arch-support inserted in the shoe, is to stand gently on a soft mass of putty or plaster of Paris until it reflects the shape of the arch. When it has become hard, a piece of stout card-board, well wetted may be applied carefully adapted to it, and contact maintained until the card-board is dry. It may then be used as a pattern and guide in shaping the arch support; usually the latter should be arched slightly more; and from time to time the arch may be slightly increased until what appears, to be the natural individual arch has been acquired for the foot. The strapping of the foot with surgeons' rubber adhesive plaster, in such a way as to pull up on the weakened arch and to pull the inner edge of the foot upward, may prove helpful.

Cold douching of the foot, followed by the rubbing in of such a stimulating liniment as hartshorn, chloroform, or arnica, etc., may suffice in mild cases in conjunction with correction of the causes of the improper condition.

Some claim that the wearing of proper shoes will cure, with due rest and massage of feet and ankles, almost any degree of recently acquired flat-foot tendency, or even condition.

It has been found that in some cases, even obstinate ones, that use of the X-rays or of the violet rays produces prompt and permanent cure of the policeman's disease.

Walking and standing so as to throw the weight on the outside of the foot, keeping the feet parallel and the body duly erect with much rest and proper care of the feet, are important features in all cases, for a complete and permanent restoration and to prevent primary or recurrent development of any degree of policeman's disease.

In such endeavor, incidentally, it would be helpful to him if when he is on duty he would occasionally manage to stand, for a short time, with one foot in the gutter and the other on the curb, or in a similar position; this will rest the strained muscles and materially help to maintain the integrity and well-being of the feet.

Finally, it is unequivocally evident that a policeman should rest his feet at every opportunity and should continuously give them painstaking care and attention.

BETA-CHI INSTALLED IN THE UNIVERSITY OF CINCINNATI

BY DR. A. RICHARD BLISS, JR., *Grand Historian and Editor*

One day in October the writer received a letter from Brother L. V. Kane, lately of the United States Army and a former member of Delta Chapter in the University of Maryland, now a sophomore in the medical school of the University of Cincinnati, requesting information concerning the "technique" for the organization and installation of a collegiate chapter of Kappa Psi. Needless to say, the information, instructions, etc., were immediately forwarded to Brother Kane, and a pleasant acquaintance and friendship that were begun several years ago at the Delta chapter-house in Baltimore and continued by accident at the Beta-Lambda chapter-house in Washington, D. C., a little later, were thereby perpetuated. After an exchange of several letters, a petition, signed by Brother Kane and his group of exceptionally excellent material, was forwarded to the writer, endorsed by him, and sent on to the members of the Grand Council for their votes. The vote was unanimously in favor of granting the petition and thus BETA-CHI CHAPTER in the College of Medicine of the University of Cincinnati was brought into the Kappa Psi World.

The fifteenth of November was chosen as the date for the installation. Dr. Grant, Grand Regent, was unable to leave Boston for this event, so he wired the writer to proceed to Cincinnati as his official representative and install the group of petitioners in the College of Medicine of the University of Cincinnati as Beta-Chi Chapter of Kappa Psi. The orders, fortunately, fitted in well with some other plans, so, on the night of the fourteenth the Grand Historian and Editor left Atlanta and arrived in Cincinnati early on the morning of the fifteenth. Imagine the writer's surprise when Brother-to-be Schirrmann of the University of Cincinnati stepped up to him as he came through the gate at the Terminal Station in Cincinnati and said, "Isn't this Doctor Bliss?" A hundred or so people had detrained and neither the writer nor Brother-to-be Schirrmann had ever met before, so Schirrmann's "picking" was unusually good since no identifying marks of any sort were worn. Brother-to-be Fraser, who had been "guarding" another exit, soon came up, and, after introductions, the party of three proceeded to 3109 Harvey Avenue where the "Kappa Psi Bunch" holds forth. Brother Kane, who is a "sure enough heavy sleeper" and requires a gross of "Big Bens" in addition to the "vocal efforts" and "massage" of Schirrmann to awaken him, was just arising from "the hay"!!! The meeting was a most pleasant one, for several years had elapsed since Brother Kane and the writer had last met. After a hearty breakfast, Brother Schirrmann took the writer in tow for a visit to the Cincinnati General Hospital and the College of Medicine of the University of Cincinnati. The writer's last visit to Cincinnati occurred before the present hospital was completed and before the medical college was moved to its present site, so he therefore had many new things to see and "feast his eyes on" in these two wonderful institutions. Over four most enjoyable hours were spent in these two institutions and delightful visits made with Professor Jackson, head of the Department of Pharmacology, and Professor Fisher, head of the Department of Physiology of the medical school. Luncheon with Brother Schirrmann and Brother Fraser was enjoyed in the medical college "Commons," and then the return trip to 3109 Harvey Avenue made. Here the rest of the "bunch" had gathered, and, introductions completed, the afternoon was devoted to Kappa Psi talk and discussions, and plans for the evening's events and also the future of Beta-Chi in the University of Cincinnati were laid.

After dinner with the petitioners, the members of Beta-Chi-to-be were called to order and the ceremonies of installation begun. The election of officers resulted as follows: Regent, J. A. Fraser; Vice-regent, L. D. Allard; Secretary, W. J. Butt; Treasurer, H. A. Schirrmann; Historian, L. V. Kane; and Chaplain, C. W. Justice. These officers were then installed and the chapter went into its first regular session, Brother Fraser presiding. The details of chapter business, the relation of Grand Council and collegiate chapters, the graduate chapter

INSTALLATION DINNER OF BETA-CHI CHAPTER

Allard, Bliss, Fraser, Butt, Kane (front), Schirrmann, Justice

organization, Province organization, the proper conduct of the Ritual, finances, and other important features of Kappa Psi work were thoroughly gone into. The installing officer was surely pleased with the enthusiasm, earnestness, and ardor displayed by the newly made Knights of the Brotherhood of Psi. The first meeting in the life of Beta-Chi Chapter was carried out with all the energy, feeling, and intentness that one looks for in an old, experienced chapter of Kappa Psi, but does not expect in the case of a newborn infant chapter. This certainly augurs well for the future of Beta-Chi and Kappa Psi in the University of Cincinnati. The "speed" of our new brothers had already caused the other fraternities "to sit up and take notice" of this young giant who had just entered the "Greek World Lists," and the indications pointed toward anxiety on the part of the others because of the evident strength, vigor, and power of this new contender for the laurel wreath. Well may they look to their laurels, for Beta-Chi is assuredly a giant and no better men can be found in the student body of any institution than those who compose the charter personnel of the Cincinnati chapter of Kappa Psi. Kane is to be congratulated upon his great work, and Kappa Psi may well felicitate themselves upon their good fortune in adding this new chapter and these new Knights to the Brotherhood of Psi.

Following the installation came the installation banquet, and banquet it surely was, served right in the dining-room of "Number 3109 Harvey Avenue" which was beautifully decorated in the Kappa Psi scarlet and grey. The writer never sat down to a more delicious feast. Served with the cream were cakes that one of the boys said were too good to eat. The writer, although agreeing with the statement, nevertheless made way with the delicious pastry, which consisted of individual diamond-shaped cakes, beautifully iced and mounted with the Greek letters "Kappa" and "Psi" in red icing. They were great. In fact nothing could have been improved. Finally "Beta-Chi's Coming Out Party" broke up well after one A. M., after a most enjoyable and profitable but strenuous evening's work. The most comfortable room that awaited the installation officer was never more welcomed in its existence, for the activities of a long day had well nigh exhausted him.

An early morning (Sunday, November 16) start had to be made in order to make Louisville, Kentucky, in time to officially inspect Upsilon and Beta-Mu Chapters and to install the Kentucky Graduate Chapter on the evening of Monday, the seventeenth, so Brothers Kane and Schirrmann very kindly "tumbled out" with the early birds, and Brother Schirrmann again very kindly acted as official guide and conducted the writer safely to the terminal station in time to make his train south.

The writer wishes to take advantage of this opportunity to express his sincere thanks and deep appreciation to the brothers of Beta-Chi in the College of Medicine of the University of Cincinnati for their many

attentions and courtesies extended him during his visit. Also to Doctor Jackson and Doctor Fisher of the university faculty for their kind attention and enjoyable visits, and to the librarian of the Cincinnati General Hospital for the time she spent showing us through the extensive library, explaining the filing system, and supplying some desired information and data. Here's to Beta-Chi, may the future bring nothing but success in great measure to the chapter and its individual members.

THE COLLEGE OF MEDICINE OF THE UNIVERSITY OF CINCINNATI

Through adoption of its new city charter by the City of Cincinnati in 1916 the College of Medicine of the University of Cincinnati (a municipal institution) and the Cincinnati General Hospital (also a municipal institution) were fused into a single organization administered by the Board of Directors of the University of Cincinnati. This act made permanent an arrangement which had previously been existent as an affiliation. The faculty of the College of Medicine thus became the attending staff of the General Hospital and, conversely, the attending staff of the hospital became responsible not only for the care of Cincinnati's ill poor but for the teaching of the medical students.

Historically, the present College of Medicine is the outgrowth of the old Medical College of Ohio, the Miami Medical College, the Pathological School of the Cincinnati General Hospital, the Cincinnati College of Medicine and Surgery, and the Laura Memorial Medical College. The Medical College of Ohio was established in 1818 by an act of the Ohio legislature with the great Daniel Drake as its first president. In 1852 the Miami Medical College was founded. The two schools were united in 1857 and continued as a unit until 1865. Before this date the Laura Memorial Medical College was fused with the Miami, and the Cincinnati College of Medicine and Surgery with the Medical College of Ohio. In 1896 the Medical College of Ohio became the Medical Department of the University of Cincinnati. In 1909 the Miami Medical College also became an integral part of the university, the two faculties becoming united under the name of the Ohio-Miami Medical College of the University of Cincinnati. About the same time the interests of the Pathological School of the Cincinnati General Hospital were fused with the Ohio-Miami Medical College and by a system of interlocking directorates, the old Cincinnati General Hospital and the Ohio-Miami Medical College became fused as a teaching unit. From this time on all the principal medical interests of Cincinnati have centered in one spot and have been built up about a common ideal.

The ground area comprises sixty-seven acres. The Board of Trustees of the university has medical administrative charge. Of this the buildings now standing and embraced within the roughly rectangu-

lar area shown in the bird's-eye view occupy twenty-seven acres. This rectangle embraces roughly nine city blocks. The so-called medical college building stands on a separate plot of twelve acres.

THE GENERAL HOSPITAL is owned by the city and has no accommodations for pay patients. Private patients are accommodated in five other large hospitals, one of which is just across the street from the General and three others within a mile. It was built at a cost of about \$5,000,000. It has 850 beds. It is built on the pavilion plan and embraces twenty-four large buildings, all connected by overground and underground corridors. The contagious group consists of a separate unit of seven pavilions similarly connected with each other.

THE BRANCH HOSPITAL FOR TUBERCULOSIS is a part of the General Hospital and is administered by its staff. It consists of some six well-equipped pavilions and a laboratory located pleasantly on high ground in the suburbs of Cincinnati.

THE NEW COLLEGE DISPENSARY. This occupies the basement floors of three of the general ward buildings and was opened in May, 1917. Connected with it are a general administrative staff and a large corps of nurses and social service workers. A drug department and clinical laboratories are also included. Over 30,000 patients were treated at the dispensary last year.

THE LABORATORIES for anatomy, biochemistry, physiology, pharmacology, bacteriology, and pathology are housed in what is known as the college of medicine building and the pathologic institute. The College of Medicine building was completed, ready for occupancy in October, 1917. It was built largely by the generous gift of Mrs. Mary M. Emery, and with equipment has cost about \$750,000.

L. V. K.

KENTUCKY GRADUATE CHAPTER INSTALLED

(Upsilon, Beta-Mu, Memphis, and Beta-Theta Chapter Inspections)

By DR. A. RICHARD BLISS, JR., *Grand Historian and Editor*

Along with the instructions sent the writer by the Grand Regent concerning the installation of Beta-Chi at Cincinnati, came directions to stop over on the way back from Cincinnati and (1) install Kentucky Graduate Chapter on the seventeenth of November, (2) officially inspect Beta-Mu Chapter, (3) officially inspect Upsilon Chapter, all at Louisville, Kentucky; then to proceed to Memphis, Tennessee, and (4) officially inspect Beta-Theta Chapter, and (5) officially inspect Memphis Graduate Chapter.

Having carried out "(1)" set forth above, the writer arrived in Louisville, Kentucky, during the early afternoon of November 16 and established headquarters at the Seelbach Hotel. Immediately after luncheon, in response to written instructions sent several days pre-

vious, the officers of Beta-Mu arrived for the official investigation and inspection. The writer is very much pleased to report to the Grand Council that things are running along in great shape with Beta-Mu, the chapter working as a harmonious whole and the future promising great things for Kappa Psi in the University of Louisville. The conference ran on well into the evening. On the following morning and afternoon, November 17, the writer proceeded with the inspection of Upsilon. Promptly at the designated hour Upsilon's officers and a goodly delegation of the lay brothers met at headquarters. Upsilon was almost wiped out by the World War, just one year ago this time there being but one man left in Upsilon Chapter! Today Upsilon Chapter numbers almost thirty members of the real Kappa Psi calibre, led by officers of the enthusiastic, energetic, "peppery" kind that means nothing but a chapter full of life and "pep." The writer feels that Upsilon Chapter has never been as successful in its work and functions as it is right now. Further, that Upsilon will without doubt continue in its great work, especially because of the active, wholehearted interest of its faculty and graduate members. With Brother Suter to head the graduate forces behind Upsilon, and Brother Middleton to head the graduate forces behind Beta-Mu, Kappa Psi need have no fears for the continued success of its collegiate chapters in Louisville.

The conferences with Upsilon occupied both morning and afternoon, and the writer had just sufficient time to "scrub up" a little in preparation for the "big event" of the evening. At 6:30 p. m. on the evening of the seventeenth of November, about sixty Kappa Psis, representing the Kentucky Graduate Chapter, Upsilon, and Beta-Mu, gathered at the Watterson Hotel to take part in the installation ceremonies of the Kentucky Graduate Chapter and to celebrate the event by a most enjoyable installation dinner. Before the installation the writer had the great pleasure of meeting with the entire Beta-Mu and the Upsilon Chapters and took advantage of the gathering to dispense a mixture of praise and congratulation with some criticism which he hopes proved of some service to these two excellent chapters.

The Kentucky Graduate Chapter was then taken care of according to the procedure defined by the Constitution of the Order. Brothers J. W. Dyer, A. R. Middleton, A. L. Suter, O. C. Jackson, G. L. Curry, B. Weatherford, R. B. Cunningham, C. W. Dorn, R. E. Montgomery, H. R. Skaggs, J. W. Moss, J. C. Munch, R. B. Denman, J. A. Mitchell, C. Brookover, G. R. Orme, B. M. Brigman, D. H. Herndon, W. O. Votteler, M. D. Spoonamore, H. Hannan, W. R. Forbes, L. L. Segraves, H. O. Hausigen, G. M. Beasley, C. M. McDowell, O. M. Lynch, C. M. Haggard, D. W. Stewart, C. J. Robinson, J. M. Threkeld, and W. L. Gossett are the charter members of this valuable addition to the graduate roll. The election of officers resulted as follows: Regent, Dr. J. W. ("Jack") Dyer; Vice-regent, Dr. A. L. Suter; Secretary, Dr. A. R. Middleton; Treasurer, Dr. C. J. Brookover; Historian, Dr. W. O.

KENTUCKY GRADUATE CHAPTER INSTALLATION DINNER

Votteler; Chaplain, Dr. D. H. Herndon. These officers were then duly installed. The writer feels confident in saying that no better or more interested or energetic set of officers can be found anywhere, and feels that through their leadership Kentucky Graduate Chapter will surely have a continuous, successful, useful existence and prove a wonderful backing for Beta-Mu and Upsilon. The chapter is especially indebted to Brothers A. L. Suter and A. R. Middleton for their faithful, invaluable work.

The installation completed, the gathering sat down to the splendid dinner that was waiting. Needless to say everybody did justice to the delicious courses that were served; and, after the tables were cleared, Brother R. E. Elliott, genial Regent of Beta-Mu Chapter, acting as toastmaster, the "talk fest" started. Many instructive and entertaining short speeches were made. The writer unfortunately did not note the names of the many brothers who responded to the invitations of Brother Elliott. It suffices to state that the talks of Brothers Middleton, Suter, Elliott, Hertel, Jackson, Owens, and the rest of the graduate and active speakers, were all brimful of enthusiasm and "pep" and certainly served as an efficient stimulus to greater work and endeavor on the part of their listeners. Now that Upsilon and Beta-Mu Chapters have such an energetic, enthusiastic graduate chapter working along with them, Louisville must surely prove a "hot-bed" of Kappa Psi activities and success, for nothing can stop the work of three such strong, active bodies of Kappa Psi men.

The writer desires to express his appreciation of the many kindnesses shown him by the members of Upsilon, Beta-Mu, and Kentucky Graduate Chapter. It was indeed a pleasure to be with you again. It has been reported that Louisville is "after" the 1920 Grand Council Convention. All that the writer need say at this time is, that if Louisville is fortunate enough to be awarded the Grand Council Convention of 1920, the Fraternity may rest assured that the meeting will be taken care of in true "Kentucky style," which is, as the saying goes, "saying a mouthful."

The writer left Louisville at about midnight of the seventeenth and proceeded on his way to Memphis, Tennessee. He arrived on the afternoon of the eighteenth to find the city full to overflowing of delegates to the Tri-State Medical Association Convention and a Baptist Ministers' Convention. It was rather unfortunate, as far as the objects of the writer's visit were concerned, that his visit occurred at the same time as the first mentioned convention, for the attention of the graduate Kappa Psis was naturally given to and their time taken up largely by the various sessions of the medical association. However, without much effort, conferences with Brothers F. R. Kenton, V. D. King, I. G. Duncan, and several other members of the Memphis Graduate Chapter were arranged, the business of the graduate chapter and of Beta-Theta Chapter discussed, and plans for the future laid. Because of the

medical association meeting and the fact that it had been impossible to announce beforehand the date of the writer's visit, it was decided that it would be unwise to try to hold a regular meeting of the graduate chapter that evening or the following one. The time was profitably spent, and, with Kappa Psi's welfare in the hands of such an influential body as the Memphis Graduate Chapter, things should move along nicely in this Mississippi River city. Some difficulty was experienced in locating Beta-Theta's regent, Brother I. F. Peak. Dr. Kenton finally located him and he and the writer proceeded to his home and routed him out of bed close to the midnight hour! Fortunately Peak is an Irishman, a scarred veteran of three wars, the wearer of several decorations for valor, and full of fight and love for Kappa Psi, so the disturbance was greeted in decidedly cheery fashion and the midnight visitors made to feel that they were indeed welcome. Arrangements were made for a meeting for the coming day.

On the morning of the nineteenth, the writer rode out to the College of Medicine of the University of Tennessee to continue the conference begun the night before with Regent Peak. The entire morning was spent at the school and at five-thirty the same evening the writer assisted in the initiation of Brother H. R. Green of the senior class, an initiate who since has proved his worth as a true Knight of the Brotherhood of Psi. The visit of the day showed that the sophomore and freshman classes in the College of Medicine of U. of T. do not muster together a total of twenty men! Little wonder then that the four fraternities in the medical school are rather small numerically. However, plans were discussed and a course finally decided upon which has since borne fruit, for, since the writer's return to Atlanta he has learned that Brother John S. Borg, a graduate of the Christian Brothers College of Memphis, now a student in the U. of T. has been initiated, and six more excellent fellows have been pledged and will be soon initiated. "Fighting Captain Peak" and his faithful lieutenant, Green, have proven themselves a flying squad of two men that it will be difficult to beat anywhere, be it Memphis, France, China, Africa, Belgium, Germany, or the North Pole. Our hearty congratulations to Brothers Peak and Green, and also to Brother Kenton, one of the most faithful of graduate members, King, Duncan, Bolton, and the rest of the Memphis brothers. The writer is indeed grateful to these brothers for the courtesies shown him during his visit in Memphis. By making a flying trip down Main Street the writer was just able to make his train south, arriving in Atlanta on the twentieth in time for his routine duties at home.

BETA-PSI CHAPTER INSTALLED

BY PROF. H. A. LANGENHAN, X

It afforded me a great deal of pleasure to be offered the commission of installing officer of Beta-Psi Chapter of our Fraternity in the University of Wisconsin. Inasmuch as the newly elected brothers have been, more or less, under my instructive (?) supervision for the past two years, it does not well become me to say much about them. Suffice that I have waited six years before considering any serious action even though this intentional delay evoked a letter or so from our "Commanding Officers." However, the wait was worth while, and the Grand Council is to be congratulated, not only because of their good judgment in granting this charter, but also in giving to us, by this act, twelve STANDARD Kappa Psi brothers.

The installation took place, with due decorum, Saturday, December 6, five-thirty P. M. at the Park Hotel at Madison, Wisconsin. After a preliminary talk followed by the administration of the oath, the following officers were elected: Regent, F. C. Rath; Vice-regent, E. W. Dieter; Secretary, H. Consigny; Treasurer, G. A. Falstad; Historian, M. Phillips; Chaplain, W. M. Mercer; 1st Ph., L. L. Wright; 2nd Ph., S. E. Ross; D., W. K. Mills; P. A., J. B. Johnson; O., H. P. Hougan; Critic, V. B. Critchlow.

The election completed, the waiters hovering near the locked door were given a temporary password and told to proceed. Needless to say that the good-fellowship of that circle of thirteen around the table brought back to me the by-gone days of Kappa Psi at Chicago.

Following the dinner (and it was some dinner) the officers were installed, a further discussion of the ritual and constitution took place, and the songbooks were given a good try-out. The meeting was adjourned by the Regent in proper Kappa Psi form and spirit, at nine P. M.

Although I have hesitated discussing our new brothers, for obvious reasons, I feel that Brother Rath deserves special mention.

Let me begin with an unpleasant day in the first-line trenches at Chateau Thierry where Brother Rath deviated from his duties of the first aid squad and played catch with a high explosive shell. Then let us pass over to the office of the Physicians of the Federal Board Commission where a rating of 99% disabled was the verdict and the subsequent selection of and the coming to the University of Wisconsin, by Brother Rath.

This much for pre(r)amble.

In order to establish a fraternity at the University of Wisconsin it is necessary for the petitioning body:

First. To present their petition and scholastic records before the Student Life and Interest Committee (composed of faculty members);

CHARTER MEMBERS, BETA-PSI

Top: Mills, Hougén, Johnson, Wright, Falstad, Rath.
 Bottom: Dieter, Phillips, Mercer, Langenhan, Ross, Critchlow, Consigny.

Second. To present the favorable report of this committee before the Student Senate (composed of students and presided over by the president of the university).

It was Brother Rath who first approached the dean of men (Chairman of the Life and Interest Committee), who obtained the necessary information for both committee and Senate, who appeared before the committee and having obtained a favorable report interviewed President Birge, with a copy of "Baird" and a history of Kappa Psi under his arm, so that the presiding officer of the Senate might be fully informed of the purpose of Kappa Psi when the matter of the petition should come up before the Senate for approval or rejection.

That Brother Rath carried the first and second lines successfully is evident, and with his unfailing enthusiasm he needed not the eleven reserves awaiting his orders. Some of you may not realize how much initiative and diplomacy were displayed in the work of Brother Rath but WE do.

Listen, ye Brothers Kappa Psi! Beta-Psi has a "one per cent able" man according to a Federal Board rating. Envy Beta-Psi! and at the same time tremble, for what he attempts, he does, even to interviewing presidents and shells.

H. A. LANGENHAN, *Chi and Graduate Zeta*,
Chemistry Building, Madison, Wis. *Installing Officer.*

THE UNIVERSITY OF WISCONSIN

In 1838 an act was passed by the territorial legislature establishing the university of the Territory of Wisconsin, and appointing a Board of Visitors for its government. No action toward establishing the university was taken under this law except the selection of two townships of land appropriated by Congress. In 1848 the constitution of the State of Wisconsin made provision for the establishment of a state university.

In 1849 the Board of Regents held its first meeting and began the work of organizing the university. The first building (now North Hall) was constructed in 1851. Four years from that time South Hall was completed, and in 1861 University Hall was finished. In 1866 the university was reorganized by act of the Legislature, which also provided for uniting with the university the College of Agriculture, endowed with the proceeds of the Agricultural College grant given by the United States in 1862. In 1867 the first appropriation, of about \$7,000 a year, was made by the state. Since that date the state has made repeated and large appropriations of money for the construction of buildings and for providing apparatus, and also for meeting the ordinary expenses of the institution. The College of Law was established in 1868; the College of Engineering began its work in 1870; the

COPYRIGHTED 1907

BIRDS-EYE VIEW OF CAMPUS OF UNIVERSITY OF WISCONSIN

School of Pharmacy in 1883; and the School of Economics, Political Science, and History in 1892. The Summer School was organized in 1887, the School of Music in 1895, the School of Education in 1897, the Summer Session of the University in 1899, and the School of Medicine in 1907. The present enrollment is 6,872, of whom 2,375 are women.

As stated before the School of Pharmacy was established in 1883. Dr. Frederick B. Power, for many years since the Director of the Bourroughs and Wellcome Research Laboratories of London, was given general charge of the instruction in pharmacy. Needless to say that many adverse conditions were met the first few years. With the general development of the department the "coöperative" system of instruction introduced by Professor Powers was continued. Thus the

SCIENCE HALL, UNIVERSITY OF WISCONSIN

pharmacy students obtain their instruction in botany in the biology building under the supervision of the Botany Department, and chemistry (general, analytical, and organic) in the chemistry building under the supervision of the Chemistry Department.

The Pharmacy Department is located on the third floor of the chemistry building where it maintains well-equipped laboratories for both undergraduate and graduate research and instruction.

The courses of instruction lead to a Ph.G. degree after the successful completion of two full years of work and the B.S. after the successful completion of four years of work. In addition graduate work in each branch is offered. The first degree of Doctor of Philosophy (Pharmacy

CHEMISTRY BUILDING WHERE PHARMACY DEPARTMENT IS LOCATED

course) conferred in this country was issued in 1917. Since two more Ph.D. degrees have been conferred in Pharmacy.

Another pioneer movement introduced by the Department of Pharmacy is the Pharmaceutical Experiment Station. This was established by an act of the Legislature in 1913. At present it is the only Pharmaceutical Experiment Station in existence in this country.

The School of Medicine is located in Science Hall. Only two years of medicine are given at the present time. However, the completion of the first two units of the hospital buildings and the legislative enactment of last year granting the establishing of the full medical course mark the beginning of a new era for this school. In connection with the university hospitals, the School of Medicine, realizing the value of efficient coöperation with the Pharmacy Department, established the "university dispensaries" and straightway turned their supervision over to the Department of Practical Pharmacy. Again the "medics" are to be congratulated for their good judgment.

H. A. L.

LIBRARY OF UNIVERSITY OF WISCONSIN

THE JOHNS HOPKINS UNIVERSITY

Medical School

December 10, 1919.

To the Grand Council of the Kappa Psi Medical Fraternity,
A. Richard Bliss, Jr., M.D., Grand H. and E.,
School of Medicine, Emory University,
94 North Butler Street, Atlanta, Ga.

Greeting:

We, the undersigned students in the Medical School of the Johns Hopkins University, do hereby petition the Grand Council of the Kappa Psi Medical Fraternity for a charter as a collegiate chapter in the said institution. In the event our petition be granted, we do promise to uphold and abide by the constitution and by-laws of the Kappa Psi Fraternity, to insure the successful continuation of the chapter by the annual initiation of underclassmen of the proper calibre, and to do all in our power to advance the interest of the Fraternity and the chapter.

Respectfully submitted,

K. W. EBELING,
W. E. CHAPIN, JR.,
D. V. HUDSON,
GEORGE S. SPRAGUE,
JOSEPH S. J. MANNING, II,
Petition Committee.

COLUMBIA UNIVERSITY IN THE CITY OF NEW YORK

College of Physicians and Surgeons

To the Grand Council of the Kappa Psi Medical Fraternity,
c/o A. R. Bliss, Jr., A.M., M.D., Grand H. and E.,
School of Medicine, Emory University,
94 North Butler Street,
Atlanta, Ga.

Greeting:

We, the undersigned students in the College of Physicians and Surgeons of Columbia University, do hereby petition the Grand Council of the Kappa Psi Medical Fraternity for a charter as a collegiate chapter of the said organization in this institution. We do further petition, in the event our request receives favorable action, that the graduate members of the Beta Chapter of the Delta Omicron Alpha Medical Fraternity, the Alpha-Kappa Chapter of the Phi Delta Medical Fraternity (both organizations having been absorbed by the Kappa Psi Medical Fraternity in 1917-18), both of which chapters existed in this institution, as well as the *P. and S.* graduate members of Gamma Chapter of Kappa Psi, be officially designated as composing the graduate membership of our chapter. We do promise, in the event of favorable action on our petition, to abide by and uphold the constitution and by-laws of the Kappa Psi Fraternity, to insure the successful working of the chapter by the annual initiation of underclassmen of the proper calibre, and to do everything in our power to advance the interests and welfare of our chapter and Fraternity.

We are enclosing our check to cover the charter fee and the Grand Council initiation fee of each of the undersigned petitioners.

Respectfully submitted,

J. HERBERT BLISS,
JACOB L. LOCHNER, JR.,
LELAND E. STILWELL,
CHARLES E. THOMSON, JR.,
FRANKLIN L. WILBUR,
JOSEPH S. J. MANNING, JR.,
HOWARD A. DISBOUGH.

February 2, 1920.

First allow us to express our regret that, in the rush of getting out the last issue of *THE MASK*, the November number, an error was made in setting up the cover material, and the issue appeared as "The Beta-Mu Number" instead of "The Beta-Nu Number" as was intended. However, we feel sure that all *MASK* readers knew that the issue was dedicated to our revived Beta-Nu Chapter at Creighton University since its group picture was featured and nice space given the articles entitled "Beta-Nu Chapter Installed" and "The Revival of Beta-Nu."

In our last issue we were happy to welcome the revived Beta-Nu Chapter at Creighton University, and to publish the petitions for charters from the University of Cincinnati and the University of Wisconsin. We were also bold enough to prophesy the exhaustion of the second or "Beta" alphabet and the beginning of the third or "Gamma" alphabet. In this issue we are more than happy to publish accounts of the installations of our new chapters BETA-CHI in the University of Cincinnati at Cincinnati, Ohio, BETA-PSI in the University of Wisconsin at Madison, Wisconsin, KENTUCKY GRADUATE at Louisville, Kentucky; and to make good our prophecy (as the weather man sometimes does) concerning the exhaustion of the second alphabet, etc., by publishing petitions for charters from the Johns Hopkins University at Baltimore, Maryland, and the College of Physicians and Surgeons at New York City.

We extend a hearty welcome to the members of BETA-CHI, BETA-PSI, AND KENTUCKY GRADUATE, and our sincere congratulations to Brother Kane, Brother Langenhan, and Brothers Middleton and Suter for their excellent work in behalf of these new chapters. We also extend our hearty congratulations to Brother E. C. Albritton, formerly of Pi Chapter at Tulane University, now of Johns Hopkins University Medical School, and to Messrs. J. Herbert Bliss, J. L.

**Hopkins and
P. and S.
Petitions**

Lochner, Jr., and Leland E. Stilwell of the College of Physicians and Surgeons of New York, for the excellent judgment and energy displayed in their organization work at these institutions. All the members of these five new chapters are of the highest calibre, and the future will most surely show the wisdom of the Grand Council in granting their petitions. The Hopkins Chapter will be installed as BETA-OMEGA CHAPTER, thus completing our second alphabet, on the night of January 17, 1920, by Grand Regent Justin F. Grant of Baltimore and Grand Secretary and Treasurer Press W. Eldridge, Jr., of New York City. The same gentlemen will install the P. and S. chapter as GAMMA-GAMMA, the first of our third alphabet, on the evening of March 19, 1920. A hearty welcome to our five new chapters.

"And still the good work goes on!" As we go to press we are informed of the great news concerning the revival of our PSI CHAPTER in the College of Medicine of Baylor University at Dallas, Texas. In 1915 Psi was forced to return its charter because of the fact that the university authorities ruled out fraternities in the institution. Soon after, the Dallas Graduate Chapter was organized and installed and the good work continued among the graduate members through its medium. About the middle of December the ban was lifted by the Baylor University Board of Trustees and immediately OLD PSI was revived. Good work, Brothers of PSI and Dallas Graduate Chapter. We will be very glad indeed to give you all the space you desire in our next issue. A hearty welcome back into the Kappa Psi fold.

All Kappa Psis who will attend the meeting of the AMERICAN MEDICAL ASSOCIATION to be held in New Orleans in April should immediately get in touch with Brother B. W. Whitfield, secretary of Pi Chapter at Tulane University School of Medicine, or Brother H. E. Menaga, M.D., Satrap of the South Atlantic Province, Medical Building, New Orleans, Louisiana. All Kappa Psis who will attend the A.Ph.A. Meeting and the UNITED STATES PHARMACOPOEIAL CONVENTION to be held in May at Washington, D. C., should get in touch with Dr. R. P. Fischelis, 828 North 5th Street, Philadelphia, Pennsylvania, or Dr. Frank T. Chamberlin, Jr., 1323 M Street N. W., Washington, D. C.

**Psi Chapter
Revived at
Baylor**

**Kappa Psis at
A. M. A., A. Ph. A.,
and U. S. P. Con-
ventions**

West Virginia Graduate Chapter announces through its Regent, Dr. Robert K. Buford of the Sheltering Arms Hospital of Hansford, West Virginia, its annual meeting and election of officers to be held during the annual State Medical Society Meeting at Parkersburg, West Virginia, in May.

Another last minute news item! Just as we were about to mail this to the publishers we were informed that a petition was on its way from OHIO and another one from NEBRASKA!! So GAMMA-GAMMA will not long retain the baby-bottle as the infant chapter of the third alphabet! We hope to have detailed news for the next issue and announce the granting of charters for GAMMA-DELTA and GAMMA-EPSILON. When we do this we will admit that we are some good prophets!!!!

THE GRAND AGORA

BETA-DELTA

H. W. VAN LOAN, U. S. A.

Died October 26, 1918, in France in the service of the United States Army Medical Corps.

BETA-ZETA—BETA-IOTA

DR. C. M. McKELLIPS

Died December 14, 1919, at Portland, Oregon. Brother McKellips was dean for many years at the Oregon State College at Corvallis, a charter member of Beta-Zeta Chapter there. Of recent years he has been dean at the North Pacific College at Portland, Oregon, and an active worker in Beta-Iota Chapter. In his passing the community loses a valued citizen, his profession an able instructor, and Kappa Psi a loyal member.

BETA-OMICRON

C. E. LEMON, Beta Omicron

CHARLES E. LEMON, U. S. N.

Past Regent of Beta-Omicron. Born in Peoria, Illinois, in 1898, moved to Washington in 1909, home at Everett, Washington. Graduated from the Everett High School in 1913 and entered the University

of Washington the fall of the same year. Enlisted in the U. S. Navy immediately following the declaration of war, and, after serving at the Puget Sound Navy Yard and at the Naval Training Station at the University of Washington, was detailed to the College of Medicine of the University of Oregon at Portland until the close of the war, and discharged about January 1, 1919. He expected to continue his work in medicine. Death resulted from a wound inflicted by the accidental discharge of his own gun as he stooped to tie his shoe string while on a hunting trip. His brother administered first aid but it was several hours before he reached the hospital. He died the next day.

BETA-RHO

WILLIAM HENRY BOHN, M.D. '19

Born November 29, 1888 at Ockley, Ind., died October 9, 1918 at Chicago, Illinois.

KAPPA PSI extends heartfelt sympathy to the members of the bereaved families of our brothers in Kappa Psi.

ALPHA

"Phil" Hill, Phar.D., M.D. (Gamma '01, Delta '06), Past Grand Historian, is located at the Robert B. Green Memorial Hospital at San Antonio, Tex.

BETA

Wm. B. Murphy, Jr., M.D. '03, is in practice at Snow Hill, N. C.

A. T. Organ, M.D. '12, is in practice at Chester, Va., c/o Chester Pharmacy.

Prof. Wortley F. Rudd, head of the Department of Chemistry in the Medical College of Virginia, has been elected acting dean of the School of Pharmacy of that institution.

Prof. L. C. Bird is on the staff of the Department of Bacteriology of the Medical College of Virginia.

A. H. Dodson, M.D., is now in practice at Richmond, Va., and is also connected with the clinical staff of the Medical College.

C. A. Clemmer, M.D. '07, Captain, Medical Corps, U. S. A., April 5, 1918 to July 1, 1919, is now in practice at Weirton, W. Va.

GAMMA

Dr. W. G. Crockett is now head of the Department of Pharmacy of the Baylor University of Dallas, Tex.

K. W. Driggs, '09, is located at 1822 Page Ave., Cleveland, Ohio, where he is in charge of the H. K. Mulford Co. interests.

Dr. Geo. Hohmann, professor of materia medica at Fordham University and Associate Coroner's Physician to the City of New York, is located at 2480 Grand Concourse, New York.

Robt. R. Gerstner is with the Oil Products Co., Inc., 50 Union Square, New York, as chemist.

Joseph Triner, Jr., after lengthy army service, is back home at 1333 South Ashland Avenue, Chicago.

John E. Murray, '04, is still holding forth at 24 Loder Street, Hornell, N. Y.

Dr. Roy A. Lehman, '17, is located at 5351 Arthur Kill Road, Tottenville, N. Y.

DELTA

N. M. Owensby, M.D., formerly Major, Medical Corps, U. S. A., is now in practice in Atlanta; offices, Peters Building.

L. V. Kane, formerly a freshman at U. of M. later of the U. S. Army, is now a sophomore in the College of Medicine of the University of Cincinnati. His address is 3109 Harvey Avenue.

Bedford E. Love, M.D. '04, is located at Roxboro, N. C.

Wilbur J. Ellis is in practice at Knoxville, Tenn. His address is c/o Elgin's Drug Store, Asylum Street. Brother Ellis was located at Camp Gordon for about two years.

Raymond Kerr is located at 237 Elizabeth Street, Hagerstown, Md. He was one of Brother Ellis' "bunkies" at Camp Gordon.

A. B. Clarke, M.D., is located at Plantersville, S. C.

Roy B. Schlosser is located at Potomac and Antietam Streets, Hagerstown, Md.

EPSILON

R. C. Mitchell, M.D. '12, is in practice at Filbert, W. Va.

M. L. Dillon, M.D., is in practice at Charleston, W. Va., offices in the Morrison Building.

ETA

Dr. W. Clifford Forbès, after lengthy service with the Medical Department of the U. S. A., attached to the famous Rainbow Division, is now back in practice at Birmingham, Ala., his home town.

Dr. H. D. Guenther, '10, is located at 240 South 9th Street, Reading, Pa.

Dr. Robt. P. Fischelis has been elected president of the Pennsylvania Pharmaceutical Association. He is also president of the P. C. P. Alumni Association.

We have heard rumors concerning the death of Brother Dan Fry, Jr., formerly of Salem, Ore. The news has not been confirmed.

NOTICE (From *Public Ledger*, Philadelphia): In the Court of Common Pleas, No. 4, for the County of Philadelphia, March term, 1918, No. 4017. Notice is hereby given that on September 16, 1918, the above-named court decreed that the name of Charles John Gebhardtshauer, also known as Carl J. Gebhardtshauer, be changed to CHARLES JOHN BOWER.

J. MORRIS DALTON,

Attorney for Petitioner.

D. B. Crawford is located at Pacific Avenue and Florida Avenue, Atlantic City, N. J.

Dr. Paul S. Pittinger is instructor in pharmaco-dynamics in the Philadelphia C. of P. He was formerly on the staff of the Medico-surgical College of Philadelphia.

IOTA

W. R. Jackson, M.D., is located at 164 St. Michael Street, Mobile.

W. C. Hannon, M.D. '16, is located at Mobile.

KAPPA

Robt. M. Avery, M.D., is in practice at Chipley (R. No. 2), Ga.

LAMBDA

A. L. Mills, M.D. '17, has been visiting at his home, 47 Lancaster Terrace, Jacksonville, Fla. Brother Mills has served over 18 months as a lieutenant, senior grade, in the Medical Corps of the U. S. N. and enjoys the distinction of having traveled more than any other medical officer of his grade in the regular service of the Navy. He is now stationed at the Naval Hospital at Key West.

E. T. Brown, M.D. '17, having been discharged from the Medical Corps of the U. S. A., is now in practice at Cleveland, Ala.

E. E. Pate, M.D. '17, formerly of the Medical Corps of the Army, is now in practice at Blountsville, Ala.

P. O. Lewis, M.D. '17, and Mrs. Lewis (formerly Miss Willie Griggs of La Grange, Ga.) announce the birth of their daughter, Rosyln Irene, on July 4, 1919. Brother Lewis is conducting a hospital at Kildav, Ky.

E. C. Sinniard, M.D. '17, is associated with Brother Lewis at Kildav, Ky.

Both of "The James Boys," M.D. '18, are now in practice at Memphis, Tenn.

MU

Dr. J. C. Jones is now dean of the Detroit College of Pharmacy.

NU

Jas. S. Fouche, M.D., has been discharged from the Medical Corps of the army and has located at Columbia, S. C.

OMICRON

Luther E. Wheat, M.D. '11, is located at Cornersville, Tenn.

PI

Dr. Chas. H. Voss is now associated with Dr. Thos. B. Sellers, also of Pi, in the Cusach Building, New Orleans.

Errett C. Albritton (Pi and Beta-Omega) was married to Miss Rietta Garland of Newcomb College (Tulane) in New Orleans, December 20, 1919. Mrs. Albritton has had several years' experience as a chemist and is now with a well-known analytical chemical firm in Baltimore. E. C. A. is now a third-year student in the Johns Hopkins Medical School.

RHO

H. C. Robles, M.D., formerly in charge of the U. S. Army health work in Charleston County, S. C., has been elected district health officer of Dougherty County, Ga., and secretary of the City Board of Health of Albany, Ga.

W. B. Tatum, M.D., formerly captain in the Medical Corps of the Army, for some time adjutant, Base Hospital, Camp Merritt, N. J., is

now assistant house physician at the Long Island Medical College Hospital, Brooklyn, N. Y.

Dr. Grady Williams, '13, is now located at Mobile, Ala.

"READ 'EM AND WEEP!" (Of course we mean because of the high cost of living!) BORN TO Dr. and Mrs. E. P. McEniry, Dr. and Mrs. T. C. Neal, and Dr. and Mrs. M. B. Allen, *three daughters!* Of course we mean one for each couple! Our hearty congratulations!

The heartfelt sympathy of the Kappa Psi Fraternity is extended to Brother J. D. Manget, who lost his father, Brother J. R. Fuller, who lost his wife, and Brother F. C. Thompson, who lost his father.

T. S. Ussery, M.D., is now in practice at Woodbury, Ga.

W. A. Dean, M.D., is now located at Tulsa, Okla.

J. Lee Rogers, M.D. '19, is with the U. S. Public Health Service at the Naval Hospital, Savannah, Ga.

T. R. ("Rat") Roberts, M.D. '19, is in practice at Cutulsa, Okla.

W. Byrd Hunter, M.D., is in Boston at the Boston Dispensary, 25 Bennet Street.

Warren E. Anderson, M.D., is in practice at Pensacola, Fla.; offices, 211 Thisser Building.

James W. Anderson, M.D., after long army service in France, is now at the Postgraduate Hospital, New York.

M. B. Allen, M.D., formerly of the Department of Pathology of the Medical School of Emory University, is in practice at Hoschton, Ga.

W. L. Mathews, M.D. '13, is now located at 410 Winder National Bank Building, Winder, Ga. Brother Mathews was recently discharged from the army.

PHI

Roy R. Barnes, formerly of the faculty of Northwestern University, is now practicing at Bushnell, Ill.

Bert Brown, '17, recently discharged from the army, is now located at 269 Palace Street, Aurora, Ill.

CHI

Grover C. Bond, '12, is located at 1001 Broadway, Mt. Vernon, Ill.

BETA-BETA

E. W. Seeley, formerly of Beta-Beta Chapter, later of the United States Army, entered the Ohio Northern University at Ada, Ohio, soon after his discharge from the army. His address is 209 South Gilbert Street.

J. A. Casper is located at Cleveland Ohio, c/o Gehrung, Broadway and Harvard Avenue.

BETA-GAMMA

D. R. Hutchinson, '18, is located at 2513 Rose Street, Berkeley, Cal.

O. R. Tuttle is back in San Francisco actively engaged in Beta-Gamma work.

BETA-DELTA

L. J. Smith is located at 220 Broadway, New York, with the National Carbon Co.

H. W. Van Loan died in the service of the United States Army in France on October 26, 1918. Kappa Psi extends heartfelt sympathy to Brother Van Loan's family.

READ THIS CONCERNING BROTHER B. A. HENSLE

(NOTE: One of the staff took one of the corners of Brother Hensler's American Drug Company stationery to a Chinese laundry in Atlanta and tried to get some laundry with it!!!!)

EXTRACT FROM CHINA PRESS

March 30, 1919

GERMAN DRUG STORE NOW AMERICAN FIRM

Voelkel and Schroeder Property and Business Purchased from Receiver by Syndicate

A syndicate of American business men has purchased the German firm of Voelkel & Schroeder from the receiver and will continue the business under the name of the American Drug Company. The new company takes over both the store on Nanking Road and the factory on Ward Road. The passing to American control of the business established by German capital over 50 years ago means that Americans have acquired the most extensive drug interests in China.

An offer to purchase was made to the receiver, Mr. G. D. Musso, by the syndicate and at a meeting of British, American, and neutral shareholders held Friday the offer was discussed and on motion by Mr. Harold Browett, acting for one of the British shareholders, the receiver was by unanimous vote requested to accept the offer.

It has been announced that the offer was made by Mr. Frank J. Raven of the Raven Trust Company and Dr. B. A. Hensler of Messrs. Park, Davis and Company, acting on behalf of themselves and a number of other Americans. Dr. Hensler is leaving Parke, Davis and Company to devote his entire time to the affairs of the new drug business. The deal is being financed through the Raven Trust Company and the legal details are in the hands of Messrs. Fleming and Davies.

The new business is now being incorporated with Dr. S. A. Ransom, Mr. F. J. Raven, Dr. B. A. Hensler and Mr. W. S. Fleming among the directors. Telegrams have been sent to the United States for the employment of three experienced graduate pharmacists and a complete staff will be engaged as rapidly as possible. The business will for the present be conducted on the old premises.

Brothers M. E. Vittaly, E. W. Miller, E. C. Miller, and P. S. Doran, all of the class of 1919, were tendered a dinner by Beta-Delta Chapter right before their departure last fall to Shanghai, China, where they will join forces with Brother B. A. Hensler.

Walter H. Belding, '19, was married to Miss Eleanor Haight of Millbrook, N. Y., on September 27, 1919. Kappa Psi extends hearty congratulations.

BETA-EPSILON

The eleventh edition of Dr. Albert H. Brundage's famous *Manual of Toxicology* leaves the press this month. Few works have been as successful and enjoyed the wide usage accorded this valuable volume. Brother Brundage is to be congratulated upon the success of his great work.

BETA-ZETA

Chris E. Johnson, '18, is now located at North Powder, Ore.

Dr. E. C. Callaway has resigned as city chemist of Portland, Ore., after seven years' service to accept the professorship of chemistry in

the North Pacific College. Brother Currey, also of Beta-Zeta, succeeds him as city chemist.

C. C. Cottel is at 225 Sherman Street, Portland, Ore.

BETA-ETA

Roy Deck, M.D., Past Regent, is now associate professor of diseases of the eye, ear, nose, and throat at the Medical School of the University of Pennsylvania.

H. C. Kelley, M.D., Past Regent, is now located at the U. S. Naval Training Station at Newport, R. I., as a naval surgeon.

H. E. Spruance, M.D., of the Medical Corps of the U. S. N., is located at Rutland Courts, Washington, D. C.

Donald G. Moyer, M.D., formerly major, M. C., U. S. A., is now located at 1153 Pennsylvania Avenue, Wyomissing, Berks Co., Pa.

BETA-THETA

Lloyd T. Ward is located at 105 South Main Street, Memphis, Tenn.

Brothers Kenton, Duncan, King, Bolton, Pulliam, Seigler, Ortiz, and McDavid are all busy with their practice at Memphis.

BETA-IOTA

Dr. and Mrs. Frank C. Pearn announce the birth of their son, William Francis, on December 26, 1919. Kappa Psi extends hearty congratulations.
