## "LEST WE FORGET"

FROM THE  
CONSTITUTION AND BY-LAWS

16. SEC. 1. *General Qualifications for Membership.*—The Kappa Psi Pharmaceutical Fraternity shall receive as members only such men as are graduates of or students in Schools or Colleges of Pharmacy which meet the requirements of the American Association of Colleges of Pharmacy, or members of the faculties of such institutions, of good character and approved social standing, and of sound mental health; furthermore, the provisions of the Ritual for Membership must be met.

17. Membership in or expulsion from another pharmaceutical fraternity shall disqualify a man for election to a Chapter of Kappa Psi; furthermore, members of Kappa Psi are prohibited from joining any other pharmaceutical fraternity (except purely honor societies).

## COLUMBUS, OHIO, GRADUATES PETITION

*Grand Council*

*Kappa Psi Fraternity*

Columbus, Ohio

August 15, 1938.

### GREETING:

We, the following regularly initiated and now graduate members of the Kappa Psi Fraternity, do hereby petition the Grand Council for a charter as a Graduate Chapter at Columbus, Ohio. We also hereby petition for the privilege of adding from time to time, to our membership by regularly initiating such graduates of the recognized colleges of pharmacy, who are not members of another pharmacy fraternity and who have not been rejected or expelled by a chapter of the Kappa Psi Fraternity, and who have given evidence of such good character and outstanding ability as will help to carry on continuously and effectively the good fortunes and prestige of our Fraternity. For this purpose we respectfully submit our petition supported by the following signatures:

R. L. McMURRAY, *Beta-Sigma*

A. W. SNIDER, *Xi*

R. H. MIESSE, *Xi*

E. F. HOFFMAN, *Xi*

L. H. WELLOCK, *Xi*

CHESTER A. STINE, *Xi*

C. M. BROWN, *Xi*

## THE VALUE OF A SMILE

A smile creates happiness in the home, fosters good will in business, and is the countersign of friends.

It is rest to the weary, daylight to the discouraged, sunshine to the sad, and Nature's best antidote for trouble.

Yet it cannot be bought, begged, borrowed or stolen, for it is something that is no earthly good to anybody until it is given away.

*Keep smiling*—and let your smile be one of sincerity. Don't just force it out to make a sale, to keep out of a fight, or for similar reasons. But smile from the heart out, making those who see you smile do likewise, in a feeling of good fellowship.

Luncheon and informal get-together of members of Kappa Psi in attendance at the A.Ph.A. meetings in Minneapolis, at Hotel Nicollet August 24, 1938.

## CENTRAL OFFICE OF KAPPA PSI

*Birmingham*

*Mr. R. L. McMurray,  
College of Pharmacy,  
Ohio State University,  
Columbus, Ohio.*

DEAR BROTHER McMURRAY:

At last things have gotten down to smooth running order, after the summer vacation period, the summer session work, and the annual meetings of the American Pharmaceutical Association and Allied Bodies, and the Grand Council of Kappa Psi is in a position to act on those matters which have been submitted to that body.

It was a great pleasure to receive the petition of the Columbus, Ohio, graduate group, and we are happy to inform you that the Grand Council has acted favorably upon the petition, the group to be installed as "The Columbus, Ohio, Graduate Chapter of Kappa Psi" at such time as may be mutually convenient. Please let me have two or three dates, in the order of relative preference, and we will get right down immediately to the final arrangements for the installation.

The Grand Council has empowered the Columbus Graduate Chapter-to-be to handle and direct the revival of our old chapter, XI, in the College of Pharmacy of Ohio State University. This power includes the pledging and initiation of pharmacy students (eligible) in that institution, until an adequate number are initiated to provide its own set of chapter officers (regent, vice-regent, secretary-treasurer, historian and chaplain). We feel that you men can and will do this as rapidly as possible, and it is even the writer's hope that you have already made a start by looking over (and even pledging) several of the best students in that school. The charter for XI will be passed on into the hands of the *new group of students* in Ohio State just as soon as the group is organized and ready for initiation. The Grand Council, too, in order to assist such a new group of students with their reorganization as Xi chapter, will not charge them a charter fee. Each such new student initiate will, of course, pay his Grand Council Initiation Fee (\$2.00, which provides each at graduation with an engraved membership certificate), and his MASK Subscription (\$10.00, which provides him with the MASK, our quarterly, for ten years). You will recall that the national dues, or per capita, consists of 50¢ per month per student members for the months of October through May of each session. (Graduates pay no national dues.) Each collegiate chapter sets its own initiation fee (out of which the \$12.00 paid to the Grand Council are taken and its own monthly dues (out of which 50¢ per student member are taken each month to pay the national dues). Be assured that we appreciate the fine work you are doing, and call on us for anything we can do.

Fraternally yours,

September 26, 1938

A. R. BLISS, JR., *G. S. and T.*

## RALEIGH (N.C.) GRADUATE CHAPTER TO BE INSTALLED

Raleigh, North Carolina  
November 8, 1938

*Dr. A. R. Bliss, Jr.*  
*Grand Secretary & Treasurer,*  
*East Lake Station, Box 7,*  
*Birmingham, Alabama.*

DEAR BROTHER BLISS:

At our first get-together meeting, held last Friday, it was decided that the following members' names are to appear upon the Charter of the Raleigh Graduate Chapter: Clarence Eugene Page, 1217 Hillsboro St., Raleigh, N.C.; James Leonard Creech, Stallings Pharmacy, Smithfield, N.C.; John Calvin Brantley, Jr., Masonic Temple Building, Raleigh, N.C.; Hubert Graham Price, Rex Hospital, Raleigh, N.C.; William Edward Hardee, Raleigh, N.C.; Otha Crowell Edwards, 615 Hillsboro St., Raleigh, N.C.; Oscar Logan Umstead, Saunders Drug Store, Rocky Mount, N.C.; Curtis H. Oakley, Thomas and Oakley, Pharmacists, Roxboro, N.C.; Joseph Leah Pinnix, Kernersville, N.C.

Our first official meeting, where we wish to present the charter to the membership, will be held, if agreeable to you, November 18 at the Old Rose Tea Room in Raleigh, otherwise any Friday thereafter which is satisfactory to you.

The following officers have been nominated: Regent, Clarence E. Page; Vice Regent, James L. Creech; Secretary and Treasurer, John C. Brantley, Jr.; Historian, H. G. Price and Chaplain, W. E. Hardee. These officers will serve until the annual election, which will be held prior to February 15.

Enclosed is our check for the charter and the names which appear above were thought best to be used in the charter as the majority of them either live in Raleigh or within a short distance. In the future we shall attempt to contact all of the membership in Eastern Carolina and solicit their support and assistance towards making this graduate chapter an active and progressive organization.

I am sorry it is requiring so much time to collect the necessary data for the MASK but I shall keep your request in mind and secure this whenever the opportunity presents itself.

With warm personal regards, I am

Fraternally yours,

JOHN C. BRANTLEY, JR.

---

CENTRAL OFFICE OF KAPPA PSI

*Birmingham*

November 9, 1938

*Mr. John C. Brantley, Jr.,  
135 Fayetteville Street,  
Raleigh, North Carolina.*

DEAR BROTHER BRANTLEY:

Your very welcome letter of November 8, and check for \$25.00 to cover the charter fee of the Raleigh Graduate Chapter of Kappa Psi arrived in this morning's mail. Congratulations on your fine work, and many thanks.

You are giving the engravers little time to get out one of our sheepskin charters, each individual charter having to be separately set up and engraved. However, I have forwarded copy to the engravers today, and am asking them to rush it out as fast as possible, hoping that, in their Thanksgiving and pre-Christmas card rush, they will be able to get it to us in time for the proper signatures, official Grand Seal, etc. Be assured that it will go forward to you within an hour after the engravers return it to us, and we hope it will reach you in time for the meeting on the 18th. Many thanks for the officers' names.

The wording of the charter will permit your group to admit to membership in the Raleigh Graduate Chapter members outside of the confines of that city, so in that way you can readily increase your member-

ship. The charter will also permit your group to actually initiate into graduate membership qualified graduates of pharmacy who have not been rejected by a chapter of Kappa Psi while students (or who attended schools in which Kappa Psi did not have a chapter at the time the individual was a student or in which Kappa Psi does not have a chapter), and who are not members of another pharmacy fraternity. This is in full accord with the Constitution, which please consult before you actually initiate. There are no formalities, of course, in the cases of graduate Kappa Psis who are admitted to your group.

Please extend my personal congratulations to the members of your group on the evening of the 18th, and tell them that this office is ready to co-operate with them in all things for the betterment of the Raleigh Graduate Chapter and of Kappa Psi as a national institution which stands for the advancement of pharmacy.

Fraternally yours,

A. R. BLISS, JR., *G. S. and T.*

---

## BOSTON GRADUATE CHAPTER

On the evening of October 28, Kappa Psi Fraternity, Boston Graduate Chapter, held a Smoker at the Fraternity House in Brookline, Massachusetts.

The purpose of the Smoker was to raise funds for a scholarship, to be known as the "Graduate Chapter of Kappa Psi Scholarship." This is to be awarded each year to the Kappa Psi student attaining the best average in his first and second collegiate years at the Massachusetts College of Pharmacy.

Dr. Lesko, of the McLean Hospital, presented a very interesting talk on the use of "Metrazol" in certain types of schizophrenia.

A very pleasant program of entertainment and refreshments was prepared by the committee in charge.

The faculty of the College was well represented by Dr. Heber W. Youngken, head of the Materia Medica Department; George Archambault of the Department of Business Administration; Ray S. Kelly, Malcolm MacLeod, and Lucien LeMaitre of the Chemistry Department. Best wishes of the chapter were extended to Maynard W. Quimby in his new work in the Department of Materia Medica.

It was interesting to note the large turnout of traveling men from the various pharmaceutical houses. Regent Herb Clark of the Eli Lilly Co., Secretary Walter Lang of the Upjohn Co., Charles Branagan also of Upjohn Co. Parke Davis was well represented by the following: Joe Conway, John Cotter, Bill Murdock, Fred Komenda, Nick Harmand, and Fay Elliot.

The Smoker was honored by the presence of William H. Glover, past president of the Massachusetts College of Pharmacy, and Honorary

member of the Fraternity. Dr. Youngken, who is the Grand Regent of the Fraernity, extended the greetings of the Grand Council.

WALTER J. LANG, *Secretary*

19 Fessenden Rd.,  
Arlington, Massachusetts,  
October 30, 1938.

Dr. E. N. Gathercoal (Chi), Retiring President of the A.Ph.A., and Dr. H. W. Youngken (Mu), Grand Regent of Kappa Psi on a sight-seeing tour of Minneapolis during the A.Ph.A. meetings.

## SOME CAUSES OF FAILURE AMONG COLLEGE STUDENTS

From 70 to 80% of the students who enter the state universities of our country in a given year fail to graduate at the end of the course. In the Eastern colleges the percentage who graduate is higher. Fifty-seven per cent of the freshmen who enter Columbia graduate as Bachelor of Arts at the end of four years, and a considerable number in addition transfer to the professional schools of the university, and thus receive their professional degrees at the proper time.

If the colleges could determine the reasons for the failure of the large proportion of students who enter, and could admit only those students who will complete the four-year course, the staggering waste would be avoided.

Some say that many students who enter college are not "academic-minded," and that this group furnishes the larger number of those who fail to finish, or graduate without gaining that which the colleges are supposed to impart.

Even the Columbia 43 per cent loss is a tremendous shrinkage, and ought to be reduced if the causes can be unearthed. Colleges as a whole wish to prevent filling up freshman classes with students who will fall by the wayside.

One may feel safe in saying that those institutions which use modern methods of selecting students, admit very few who do not possess the native ability to carry college work.

There are admitted, of course, some students who are able by hard work to get through high school, and who reach the limit of their ability when they strike college courses which require maturity of judgment and discrimination far in excess of the demands of the high school courses. I am of the opinion that this group is relatively small. Students who fall into this group should be encouraged to accept their disappointment as one of "the things of life." They should be shown that there is some satisfaction in knowing that they have advanced along the academic road to the limit of their individual ability. As with other disappointing experiences in life, the student in this group should look at his experience not as a failure, but as a discovery, chagrining and unwelcome, it is true, but nevertheless one from which there is no appeal. In spite of the teachings of Horace Mann and the structure which has been built above them by our so-called "American system," we all know that college training is not the only avenue to a successful and happy career.

At the moment it is definitely established that the student's effort is greater than the return warrants, he should promptly abandon college, and prepare himself for his life work in a fashion adopted to his individual mind, temperament, traits and ability.

There are two main groups of the students who do not reach their natural academic limit during their college career, but who fail to graduate. *First*—those who try, and *second*—those who do not try.

I have come in contact with many boys who seriously try to make good,

and who actually have the native ability to do so, but who find it practically impossible to sit at a desk and concentrate on the assigned problems. I have met the boy who sits down to study, opens his book, but before starting his work says to himself, "My pencil needs sharpening. I had better sharpen it first." He sharpens his pencil, and then notes that all his pencils need sharpening. He recalls that he has not written that letter to his parents, and decides to do that first. When he has completed that letter, he recalls that there are several unanswered letters he had better answer right now. If he smokes, he is reminded of the fact that his pipe needs cleaning; in fact, all of his twelve pipes need cleaning. And so all of his time for study has passed and nothing has been done.

Nervous habits of this type are difficult to overcome, and can be uprooted only by the student himself. You and I may recognize the difficulty, but the individual must take himself by his bootstraps and cultivate a poise and calm that eradicates the fidgets. Until he accomplishes this, he does not really try, although he thinks he is trying, and actually spends more time with open books than many students of equal ability who do good work.

Now and then I have met the boy who shows no interest in his work and who is not trying to do his work with any distinction. He is following a course mapped out by his parents, and which runs counter to all of his interests and abilities. I have met the boy whom the good Lord never intended to be a physician, an engineer, a pharmacist, a teacher, or a dentist. I have observed in many cases that the boy has ability enough to become any one of these, but the fact in the case is that he does not want to be. He wants to be a movie director, an artist, or a business executive.

It may be unreasonable for the boy to reject a promising opening in the medical profession in favor of the screen; but reason cannot control all of these things. Temperament and emotions enter in a manner that completely routes reason. One may just as effectively argue with a person that he ought to like onions when he thoroughly detests them.

This is a common cause of failure—a mistaken ambition for the student on the part of his parents. Usually the boy wins out, and, frankly, he should. If such a boy fails, it is due to the fact that it is impossible for him to try to do work that is extremely distasteful to him, and that he is convinced is leading him in the wrong direction. The college ought to catch such cases before failure is complete.

There is another group of students who do not try. I refer to the bright students who have always done their school work without effort, and who have never learned what real application is. They take for granted that they can float through college with as little effort as they did through high school. If the standards of the college are high, they find that their progress becomes more and more complicated, and finally learn that one cannot float through properly given courses in mathematics, philosophy, psychology, or for that matter, anything else. This type of student who has never learned to work, but has always depended on his ability to grasp things quickly, is to be pitied above all failing students. It is a tragedy to see this keenness go to waste, to observe that the

entire opportunity which the college has to offer is passed by because of a too receptive mind. Here again, the cure is difficult because it involves an entire change of attitude, and the cultivation of new habits. We can point out the trouble, but only the student himself can affect a cure.

Another reason for failure is ill-health—physical and mental. Many colleges are now giving this aspect of education the attention it deserves. Where adequate health service and co-operation between the college physician and the teaching staff exist, a large number of failures can be prevented; and college authorities, students and parents can clearly understand the reasons for inability to do satisfactory college work. Tuberculosis, infected tonsils, digestive disturbances, and various forms of mental, nervous and sexual difficulties are common conditions disclosed by physical examinations, and their correction brings welcome relief to student and faculty alike.

There is no substitute for good health, and however much an individual may know, it is not of much value unless he has the physical vigor to bring it to bear on the world's problems. One or two institutions have found that about one-third of the students who are dropped, leave on account of poor health. I am convinced that there are more withdrawals because of physical and mental difficulties than is commonly thought.

Most ambitious students today want to go to college, and often the financial pressure is serious. A few parents seem to feel that a boy should earn his way through college for the good of his soul. It is my opinion that no student ought to be forced to earn his entire expenses, if it can be avoided. The danger is that he may not only get a poor living, but a poor education as well. Too much work may be a detriment to health, to the value of education, or to both.

Many students of fine character and excellent ability are working from three in the afternoon till midnight seven days a week; others are undergoing blood transfusions to earn money for tuition, books, and food. Such conditions constitute another important reason for apparent failure.

There are a fair number of students whose heads are swelled and whose judgment is perverted by the attractive call of fraternity responsibilities, by so-called literary activities, musical clubs, and athletics. All of these features of college life have their place, and should receive the support of those students who are interested in them. Common sense, good judgment and self-control will solve the problem. If a student is too much interested in these side-attractions, he ought get out and become professional. In my experience, if such students are reasoned with by some one who knows youth and understands the importance of the college opportunity, they will not allow themselves to be swept off their feet by athletics or other student activities. Frankly, I do not think that there are as many failures due to this sort of thing as critics see from the outside and at long distance.

One of the saddest, as well as one of the most common errors made by man is to mistake one's calling, some do this without knowing it; others have poor teachers; some have too few of the traits of character essential to success in a specialized field of service.

And lastly there are a few lazy bluffers who drift into college and usually drift out again. Most of them have not found any serious interest in life, and some of them never will. Those who do not profit by their successes and failures, lose the very essence of all experience and die bigger fools, if possible, than when they started. Sometimes they learn their lesson, find out from experience that there is no demand for a lazy bluffer; and return to do first-rate work.

This problem demands of the college administrator about the same diagnostic ability as the physician. The youth must be helped to see life steadily and to see it whole. If we can save students from failure through foolishness, illness and sin, we are simply doing that part of our responsibility—a part of our job.

A. R. B., JR.

---

## THE SPIRIT AND SERVICE OF PHARMACY

Pharmacy is the science and art of collecting, elaborating or preparing, and dispensing drugs, medicines, and poisons. Consider the full meaning of this definition. From the time the crudest, simplest herb or animal product or ore is taken from its native source until it has been sent on its way to prevent or cure disease, no other agencies and processes than those belonging to Pharmacy have been in motion. The difference and distance between poppy juice in Asia Minor and morphine in an American hospital are tremendous, but the whole route of travel is engineered by a pharmaceutical personnel. A cinchona tree is stripped of bark in the jungles of Java, and a chain of processes then begins that ends only when quinine, an indispensable agent in controlling malaria, is available for administration. The collection, importation, elaboration, and sale of this and all other drugs are exclusively managed under the auspices of a science that is perhaps less widely advertised than are any of the major technical practices.

### PHARMACY A COMBINATION OF SCIENCE AND ART

The average person thinks of Pharmacy in terms of the average American drug store—and he does not even understand a drug store. To him Pharmacy is a merchandising enterprise that distributes a variegated assortment that includes medicines among other items. He does not see the ramifying and intricate processes that finally focus in the prescription room of the corner drug store. The packaged medicine that he purchases there may have had its origin in the depths of an African forest; it may have gone through manufacturing methods requiring the utmost exactness and scientific skill; it may have been blended with other therapeutic agents by the druggist in a dispensing service that only one in every fifteen hundred persons is competent to render. But the final buyer—the layman—sees nothing of the complicated and costly procedures that led up to this purchase.

## WORLD SEARCHED FOR RAW MATERIALS

Pharmacy comprehends three distinct functions, namely collecting, manufacturing, and distributing drugs.

A word about collecting. It is no exaggeration to say that in no other field of effort is it so necessary as in Pharmacy to search the entire world for raw materials. Every country on the globe, every hamlet almost, and every division of nature are levied upon to furnish the vast supplies that are needed to satisfy society's demand for agents against disease. Savages and scientists, earth, air, and ocean, contribute to the collection that Pharmacy secures in promoting the health interests of mankind. Startling stories could be written around the collection of any one of a dozen drugs that in their finished form show no hint of the thrill and danger that were involved in taking them from their native surroundings.

After a crude drug has been collected, it is deprived of nonessential material and usually sent to an exporter in some seaport city who has customers all over the world. The exporter grades the crude drug according to quality and fixes its price in relation to market conditions. He then ships it either to a firm of drug dealers or else to some manufacturing house. If the shipment goes directly to a manufacturer, and this plan is usual nowadays, the first step in the refining process is then begun. Some drugs, such as balsam of Peru and gum arabic, require very little treatment to make them ready for final use.

## THE WHOLESALE DRUGGIST

Most drugs, however, must be milled, purified, and elaborated by tedious and expensive processes before they are ready for shipment to the wholesaler, who is usually the next unit in the system of supply. Ordinarily his establishment is simply a depot for quantity distribution, but oftentimes it is also a small-scale manufacturing plant. The main function of a wholesaler is to maintain a stock of between thirty and sixty thousand drug store items in quantities sufficient for the needs of one hundred and fifty or more retail patrons. Located in convenient centers, able to carry infrequently used items that no single retailer could afford to stock, and affording a rapid delivery service, the wholesale druggist is a very important element in getting drugs from their source to their users.

## THE RETAIL PHARMACIST

The final unit in the scheme of drug production and distribution is the retail pharmacist. The 60,000 drug stores, scattered over this country in the proportion of one store to every two thousand persons, are the agencies in dispensing the vast number of remedial substances that go to make up our modern medicines. The part played by the retail pharmacist in the plan that has just been described is at once as necessary, important and exacting as that of any of the others. The fundamental obligation, the primary duty of Pharmacy, is to provide conveniently, quickly, and at moderate cost an unfailing supply of agents that prevent, alleviate, or cure pain and disease.

In carrying out this purpose, Pharmacy searches constantly for new drugs and experiments unceasingly in an effort to improve the quality and effectiveness of those already in use. Every generation has found its medicines more active, more palatable, and more reliable because of the extensive research conducted and financed by pharmaceutical manufacturers, teachers, and distributors. In recent years this search for drug additions and improvement has been singularly fruitful. A generous share of credit for this progress belongs to chemists, physicians and others, but since drugs as such are the primary concern only of pharmacists, and since they have enormous facilities for carrying on their operations, it follows naturally that they—the pharmacists—have played the major part—oftentimes the only part—in improving the character and usefulness of modern medicines.

#### REFINING AND STANDARDIZING DRUGS

To illustrate: A decade ago cod liver oil was a highly nauseous product tolerated only by strong stomachs and almost in disrepute by physician and layman. Today, by clever pharmaceutical methods, it is no more objectionable than olive oil and it has become the main medium for administering the vitamin that prevents or cures rickets in children.

Or consider digitalis, a drug that has no satisfactory substitute in certain heart conditions. A generation ago its strength was indeterminate because its unstable constituents could not be measured by any known assay method. In an emergency a doctor was never quite certain that he could count upon its usual stimulating effects. Pharmacy concentrated upon the digitalis problem and finally developed standardized digitalis preparations that are potent and reliable.

Turning to another type of drug we find that serums and vaccine are becoming increasingly numerous, effective, and reliable as pharmaceutical research supplements the work of the bacteriologist and physician in extending the scope of biological therapy.

The discovery of Insulin, still another class of drug, is credited altogether to two Canadian physicians, and so it should be. But the lay world knows nothing of the unselfish service of large pharmaceutical firms in making Insulin available quickly and cheaply.

Pharmacists are not simply the developers or refiners of therapeutic agents that are discovered by other scientists. For example, the first alkaloid ever to be isolated was Morphine. Serturmer, a European apothecary, separated it from opium in 1815, and named it in honor of Morpheus, the god of dreams, who in mythology was the servant of Somnos, the god of sleep. His discovery and the publication of his methods so stimulated investigation into vegetable drugs that other pharmacists in rapid order announced the finding of quinine, strychnine, atropine, codeine, nicotine, picrotoxin, etc. Iodine was made known by Courtois, a French apothecary. Bromine likewise was a pharmaceutical discovery. The list is numerous and is constantly being added to. The contributions that pharmacists make to medical science have oftentimes

been credited wrongly to physicians, chemists, or biologists simply because of a trait that is one of the finest features of pharmaceutical service; the trait namely of thinking almost entirely in terms of results and almost indifferently in terms of credit. The thing discovered or improved and not the discoverer is the paramount factor in the tradition of a true pharmacist.

Pharmacy in its collective phases has assumed a solemn obligation in its account with Society. It dedicates itself to the purpose of securing for sufferers and for those who heal suffering a plentiful supply of increasingly effective preventives and curatives. It obligates itself to deliver efficiently, courteously, promptly, and non-expensively the varied drugs that must always be needed in the battle against disease. Other activities will be secondary and supplemental, performed at no sacrifice of the dominating purpose, but simply in order to make achievement more certain.

This is the Spirit and the Service of Pharmacy.

---

### “WHAT HAPPENS IN AN HOUR”

It is estimated that each hour 6200 babies are born, and about 4600 persons are laid to rest; 2500 couples are married, and 85 are divorced. Fifteen homicides take place in the civilized (?) world, while 200,000 crimes are reported.

Textile industries convert approximately 1,000,000 pounds of cotton; 300,000 pounds of wool, 100,000 pounds of silk; and 800,000 pounds of rayon into fabrics.

The world consumes 65,000,000 pounds of potatoes, 8,000,000 pounds meat; and 80,000,000 pounds of bread. Hens lay 2,500,000 eggs. While 1,500,000 quarts of wine and 500,000 quarts of beer are consumed. Coffee is the world's favorite beverage, 50,000,000 cups being consumed each hour. The world's hourly tobacco bill is \$1,500,000.

About 700 new automobiles are built and more than 170,000 barrels of petroleum are produced hourly. Automobile accidents throughout the world, mostly in America, claim the lives of eight victims.

The coffers of the world are enriched by \$12,000 worth of gold mined. Five million telephone conversations take place, and over 65,000 telegrams are sent. The postoffices of the world are deluged with more than 1,000,000,000 letters, post cards, and miscellaneous missives, bearing postage of upwards of \$25,000,000.

Approximately 180,000 feet of photographic films are used. Paper mills produce about 2000 tons of paper, and more than 1,000,000 copies of newspapers, periodicals and various magazines are printed.

Mother Earth is not to be outdone. At the equator she rotates at the rate of 1000 miles per hour, and rushes through space around Old Sol at the dizzy speed of 65,000 miles an hour.

## NEWS FROM NU CHAPTER

November 15, 1938

DEAR BROTHER BLISS:

The Nu chapter of Kappa Psi at New Haven held their annual stag banquet at the Country Club Grill on November 7. Guests and members numbered about forty-five. A talk on "Old Time Pharmacy" was given by Dr. George E. Bolles of Danbury, Connecticut. M. Donald Cadman of Pleasantville, New York, followed with "Modern Trends in Pharmacy." Brother Cadman was the first professor of pharmacy at the Connecticut College of Pharmacy. The toastmaster was Brother John DeNicola of New Haven. Other speakers of the evening included Brothers Niel Russo, Regent of Nu chapter, Nicholas W. Fenney, Walter R. Williams, and Henry S. Johnson, Dean at the Connecticut College of Pharmacy. The article included with this letter appeared in the New Haven *Register*, a local paper, on November 3.

## PHARMACIST FRATERNITY TO BANQUET NOVEMBER 7

"Nicholas W. Fenney, regent of the Connecticut Graduate Chapter of the Kappa Psi Pharmaceutical Fraternity has announced the list of speakers for the banquet to be held in New Haven November 7, at the Country Club Grill. About seventy-five members are expected to attend the reunion.

"The list of speakers includes Dr. George E. Bolles of Danbury, newly elected member of the Board of Trustees; M. Donald Cadman of Pleasantville, New York, former professor; Dr. Henry S. Johnson, Dean; Professor Augustus A. Maier and Walter R. Williams, all of the Connecticut College of Pharmacy. The toastmaster is John DeNicola, also a trustee member of the college."

The following are the new officers of the Nu chapter: Niel Russo of Waterbury, Connecticut, Regent; Anthony Testo of Bridgeport, Connecticut, Vice-Regent; Francis Sullivan of Hamden, Connecticut, Treasurer; Thaddeus Poreda of New Haven, Connecticut, Secretary.

Fraternally yours,

THADDEUS S. POREDA,  
*Secretary*

"True friendship is one of the few real things in life unpurchasable. He who is capable of friendship finds friends rising up in unexpected quarters."

# THE GRAND AGORA

**SAM A. WILLIAMS, Ph.G., B.S., Sigma and Kappa**

---

## DRUG LAW AUTHOR SUCCUMBS TO HEART ATTACK

Sam A. Williams, Sigma and Kappa, widely-known druggist, died suddenly Sunday night, November 20.

\* \* \*

Troy, Ala., November 20—A widely-known leader in the drug profession in Alabama for nearly half a century, Sam A. Williams, 66, secretary of the Alabama State Pharmaceutical Board 35 years, died Sunday night, November 20, after being stricken with a heart attack in his store here.

Mr. Williams was the author of the present Alabama pharmacy law and also of the Alabama narcotic law, which was the first adopted in the country, antedating federal legislation. He had been a member of the State Board of Pharmacy from the time it was made a five-man body. He was a graduate of the University of Maryland, moving to Alabama as a young man. He was a member of the Kappa Psi national pharmaceutical fraternity.

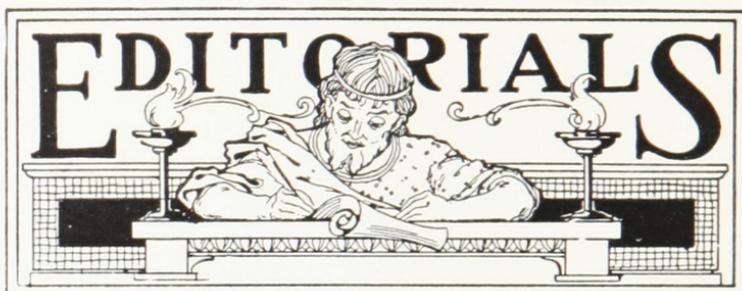

Surviving are his wife, of Troy, and a brother and three sisters in Texas. Funeral services will be held Tuesday.

---

## A KAPPA PSI PRAYER

“May Almighty God grant that this Fraternity, happily founded, may ever be enriched with His blessing; that it may increase and flourish, and be carried on to its entire perfection, to the Glory of His name, and the adornment of His true religion and sound learning, and to the greatest advantage of the public weal, to all posterities forevermore.”

---

KAPPA PSI PHARMACEUTICAL FRATERNITY  
OFFICE OF THE GRAND REGENT  
BOSTON

November 1, 1938

*To the Regents of All Chapters of Kappa Psi:*

It has come to my notice as the Grand Regent of the Kappa Psi Pharmaceutical Fraternity that a number of the Chapters are not using the formal opening and closing forms for chapter meetings prescribed by the Constitution and By-Laws and the Ritual of our Fraternity.

The important bearings these forms have on the welfare, interest, enthusiasm and teachings of Kappa Psi are obvious to all of us.

So, in order that our membership may not be deprived of the inspiration and the teachings these forms provide and insure, I as Grand Regent of the Kappa Psi Pharmaceutical Fraternity, herewith issue formal orders to all Chapters of Kappa Psi to regularly use both the opening and the closing forms referred to above at all regular meetings.

Fraternally yours,

(Signed) HEBER W. YOUNGKEN,  
*Grand Regent*

"Nothing great was ever achieved without enthusiasm." said Ralph Waldo Emerson; and, in *The Last Days of Pompeii*, Edward Bulwer-

**Graduate** Lytton says: "Enthusiasm is the genius of sincerity, and  
**Support** truth accomplishes no victories without it." Here, we believe, are found the Alpha and Omega of graduate support. The graduate support most desired and most effective is the continuous, growing support, the type which is beginning to manifest itself in Kappa Psi. In the past our graduate support has been too evanescent; too spasmodic; too much like the traditional bonfire which flares to the heavens with great heat and brilliancy, but soon burns itself out, leaving a blackness which appears all the more intense by comparison.

Kappa Psi has never needed graduate support more than it does now when its income from our chapters due to the number and size of chapters have greatly diminished. This year we believe that prospects

are better with most of our chapters; and experience shows that under such conditions optimism and a feeling of greater security prevail. The time is opportune for encouraging graduate support.

The value of the work which has been done by Kappa Psi has been amply demonstrated, and it is greatly to the interest of all graduates that our Fraternity continue to provide facilities which will assist the youth to think straight, to act wisely, and to serve well the world in which we all live. Our collegiate chapters ask for alumni support because all former members secured much during their college years as members of Kappa Psi. This is especially true of scholarship students who also received direct financial help. All should give their whole-hearted support so that Kappa Psi may be able to give its worthwhile efforts as it has in the past. From every graduate, regardless of financial status, there should come some measure of support—including financial support—liberal contributions to their chapters from those who have prospered and small gifts from those less fortunate. The amount of the individual gift is of no great moment, for it is the number of gifts which counts. Given the means and opportunity, our chapters will continue to assist in graduating men who are equipped for leadership.

---

Stop praying that the hurdles of life may be lowered. Save that breath that you waste complaining about things as they are. If you ever are to go over the top it must be with the top up there where it has to be climbed to and struggled over. It isn't going to come down to your level.

Be thankful that the hurdles of life are there. Rejoice in the fact that they are higher than most people like to jump. Be grateful for the fact that there are so many of them.

It is those hurdles that give you your chance to work your way to the front. They are your friends, your allies—they trip up the horde that would out-strip you if those hurdles were not there.

The hurdles of life are set out for a purpose. Their height, their frequency, their eternal in-the-way-ness are a part of the grand scheme of things. Take them as they come and with a prayer for the nerve-power, heart-power and leg-power to negotiate each of them as you come to it.

---

We stepped onto one of those penny scales out of which a little cardboard drops with one's weight on one side and one's fortune on the other. Our fortune read: "You have the happy faculty of making things pleasant for those around you."

Penny scales can't think, let alone read character, but there is no quality we would rather possess than the ability to make things pleasant for those whom our life touches.

Our own life is richer because we have had the good fortune to meet a number of fine men and women whose purpose in life seems to be to make life more worthwhile for those with whom they come in con-

tact. They are kind, thoughtful, considerate. They have encouraged and inspired us. They have helped us over rough places. We feel that we owe much of our humble success to them. They stand out in our mind as the most helpful men and women who have touched our life.

If we all considered the other fellow, and tried to make things more pleasant for those about us, what a great world this would be!

---

THE MASK sends you this Christmas greeting:

### A CHRISTMAS EVE

Night hid the sun and dropped her purple shade,  
Then brushed the milky way across the sky.  
Faint echoes as soft sandaled feet go by,  
And tiny insects start their serenade.  
A pulsing sound like swift seraphic wings  
Swept all around and dipped and stirred the trees,  
As if some mystic message on the breeze  
Was carried to the earth, to men and kings.  
Out of the silvery clouds a great star shone,  
Compelling, sparkling beams of flame upon  
A quiet shelter there in Bethlehem.  
Then from beyond this lovely brilliant gem  
A joyous song of love and Angels sing  
Rejoice! All glory to the newborn King!

—L. A. D. B.

### PROVINCE I

(Chapters in Albany, Buffalo, Providence and Boston)

Supervising Grand Officer: Grand Regent Heber W. Youngken  
Satrap: D. Holloway, 19 Fessenden Rd., Arlington, Mass.  
Secretary: G. F. Archambault, Boston, Mass.

### PROVINCE II

(Chapters in Harrisburg, Philadelphia, New York City, New Haven, and Newark)

Supervising Grand Officer: Grand Historian George C. Schicks  
Satrap: R. W. Rodman, 15 Gold St., New York, N.Y.  
Secretary: G. E. Milliman, Bound Brook, N.J.

### PROVINCE III

(Chapters in Baltimore, Washington, D.C., Richmond, and Chapel Hill)

Supervising Grand Officer: Grand Vice Regent H. C. Wood, Jr.  
Satrap:  
Secretary:

### PROVINCE IV

(Chapters in Georgia, South Carolina, and Florida)

Supervising Grand Officer: G. S. and T. A. Richard Bliss, Jr.  
Satrap: A. E. Butler, 47½ Columbus, Charleston, S.C.  
Secretary: F. B. Daniez, Hogansville, Ga.

## PROVINCE V

(Chapters in Pittsburgh, Morgantown, W. Va., Detroit, Toledo, Ada, and Cleveland)

Supervising Grand Officer: Grand Vice Regent C. L. O'Connell

Satrap: Dr. L. K. Darbaker, Pittsburgh, Pa.

Secretary:

## PROVINCE VI

(Chapters in Lafayette, Indianapolis, Columbus, Cincinnati, and Louisville)

Supervising Grand Officer: Grand Vice Regent C. L. O'Connell

Satrap: Prof. F. D. Stoll, Louisville, Ky.

Secretary: O. G. Anderson, Indianapolis, Ind.

## PROVINCE VII

(Chapters in Arkansas, Tennessee, and Mississippi)

Supervising Grand Officer: G. S. and T. A. Richard Bliss, Jr.

Satrap: Karl Wood, Exchange Bldg., Memphis, Tenn.

Secretary: J. C. Moore, Jr., P.O. Box 90, Topelo, Miss.

## PROVINCE VIII

(Chapters in Alabama and Louisiana)

Supervising Grand Officer: G. S. and T. A. Richard Bliss, Jr.

Satrap: E. W. Gibbs, Thomas Jefferson Drug Co., Birmingham, Ala.

Secretary: J. C. Forbes, c/o Doster-Northington Co., Birmingham, Ala.

## PROVINCE IX

(Chapters in Chicago, Valparaiso, and Madison, Wis.)

Supervising Grand Officer: Grand Ritualist L. Templeton

Satrap:

Secretary:

## PROVINCE X

(Chapters in Fargo, N.D., and Minneapolis)

Supervising Grand Officer: Grand Ritualist L. Templeton

Satrap: G. E. Crossen, St. Paul, Minn.

Secretary: A. E. Shoenecker, Fargo, N.D.

## PROVINCE XI

(Chapters in Lawrence, Lincoln, Omaha, and Des Moines)

Supervising Grand Officer: Grand Ritualist L. Templeton

Satrap: J. L. Dietz, Omaha, Neb.

Secretary: E. L. Griffith, Des Moines, Iowa.

## PROVINCE XII

(Chapters in Norman, Dallas and Austin, Tex.)

Supervising Grand Officer: G. S. and T. A. Richard Bliss, Jr.

Satrap: R. A. Beegle, School of Pharmacy, Norman, Okla.

Secretary: W. R. Neville, Jr., College of Pharmacy, Austin, Tex.

## PROVINCE XIII

(Chapters in Corvallis and Portland, Ore.)

Supervising Grand Officer: Grand Counselor A. O. Mickelsen

Satrap: Dr. F. D. Grill, 809 N. E. Oregon St., Portland, Ore.

Secretary: H. T. Hayek, 3631 S.E. Hawthorne St., Portland, Ore.

## PROVINCE XIV

(Chapters in Missoula, Mont., Pullman and Seattle, Wash.)

Supervising Grand Officer: Grand Vice Regent C. E. Mollett

Satrap: W. H. Clausen, 7718 Seward Pk., Seattle, Wash.

Secretary: J. H. McCullough.

## PROVINCE XV

(Chapters in San Francisco and Los Angeles, Calif.)

Supervising Grand Officer: Grand Counselor A. O. Mickelsen

Satrap: G. H. Frates, 809 Flood Bldg., San Francisco, Calif.

Secretary: R. J. Whidden, Los Angeles, Calif.

## CHAPTER ROLL

(Chapters Strictly Limited to Recognized Schools of Pharmacy.)

Total Chapters: 86

Collegiate Chapters: 51

Graduate Chapters: 35

## COLLEGIATE CHAPTERS

Gamma.....Columbia University, New York, N.Y.

H. H. Conklin, 115 W. 68th St., Secretary

Epsilon.....University of Minnesota, Minneapolis, Minn.

Harris Meacham, Col. of Phar., Secretary
